Britain Breaks Relations With Soviet Russia

RAID ON ARCOS DISCLOSES FACT THAT STATE SECRETS WERE SENT TO MOSCOW—A DELIBERATE ABUSE OF DIPLOMATIC PRIVILEGES BY THE SOVIET AUTHORITIES.

Premier Baldwin made in the House of Commons yesterday, perhaps the gravest announcement Parliament has had to listen to since the war—that the British Government had decided to sever all relations with Russia.

Premier Baldwin told the House that Great Britain would terminate her trade agreement with Russia on Thursday and require withdrawal of the trade delegation and Soviet mission from London unless the House should otherwise express disapproval of this course. The Premier added that Great Britain, if the house approved, also would recall her mission from Moscow.

What the premier outlined—quoting from various of the seized documents for the purpose—was proof of subversive activities of Soviet agents and that there was no differentation to be made between these activities and the activities of the trade delegation. It was a deliberate and systematic abuse of the diplomatic privileges by the Soviet authorities, which the Premier contended, justified the government in asking Parliament to endorse its grave decision to sever all relations.

Describing how the missing document from the British War Office had been photographed and sent to Moscow, Mr. Baldwin told of the police invasion of a photostat office in Soviet House which answered exactly to descriptions previously given to the police and which was occupied by a senior clerk, Anton Miller, known to be connected with the activities of the secret agents. This room occupied by Miller adjoined the private office M. Kninchuk, head of the trade delegation were also secret agents engaged in communicating information and instructions from the Red Internationale and the Red Trade Unions to Communist organizations in England and America, all of most recent date. He quoted letters and documents showing as he said, that Arcos, Ltd., and the trade delegation had been habitually used as a clearing house for subversive correspondence dealing with the "hands off China" movement and the distribution of Compropaganda in the United States.

In alluding to a list of addresses discovered as "secret cover" addresses, Premier Baldwin explained that they showed means of communicating with the Communist parties in Canada, the United States, Mexico, South America Australia, New Zealand and South Africa.

The Prime Minister also disclosed arrangements for training Communist agitators on Arcos ships with a view to their subsequent employment on British ships. The evidence now in the hands of the British authorities, he said, proves that both military espionage and subversive activity throughout the British Empire and North and South America were directed and carried out from Soviet House and that no effective differentiation of duty was observed as between the employes of Arcos and the Trade Delegation.

Successful Flight from New York to Paris

Linddbergh, U.S. Aviator, Makes Trip In Thirty-Three Hours

Captain Lindbergh, American viator on a New York to Paris non-stop airplane journey landed safely at Le Bourget flying field, France, last Saturday evening, completing his nonstop flight. His plane, "the Spirit of St. Louis," came down on the field at 10:01 Paris time, arriving about two and a half hours ahead of his schedule.

Lindbergh flew from New York to Paris, a distance of approximately 3,640 miles, in 33 hours and 29 minutes at an average speed of 113 miles an hour.

Score cards for whist drives can be obtained at Review office at a reasonable price.

Two Picked Teams To Play Football

In Medicine Hat at Six Fifteen This Evening

The football game which was to have been played in Medicine Hat between picked teams from among the players in the Medicine Hat-Redcliff league, but which was twice postponed on account of the wet weather, will be played in Medicine Hat tonight (Thursday), commencing at 6:15.

This game has been arranged for the purpose of giving the committee an opportunity of picking an all star team to play outside teams during the season.

Six Redcliff players have been picked to play this game. On one team are G. Thomson, goal; G. Davies right back; A. Dutton, outside right; on the other team are R. Pickering, fullback; J. Lakey, right back.

This promises to be one of the best games that will be seen this season. Fans should see it if possible.

As a result of these later arrangements, the local game advertised in last issue to have been played tonight, has been postponed and will be played later.

ECITEMENT IN LONDON OVER SOVIET BREAK

Rumors of an exciting character are circulating in London as to the discoveries made in the police raid on Arcos, Limited, the Russian trade organization.

It is insistenly reported that the names of several members of the Parliament are on the lists of persons to whom money has been paid by the Soviet trade delegation, and the debate in the House of Commons today on the question of breaking off all relations with Soviet Russia is awaited with breathless interest by an expectant public. The fervent hope is expressed that the Government will release more information about the discoveries.

Churches

ST. AMBROSE CHURCH

Mr. G. W. Rhodes

Sunday after Ascension, May 29th.

10 a.m. S. S. (Elder Classes).

11 a.m. Song Eucharist.

Celebrant: Rev. W. C. Western of of St. Barnabas, Medicine Hat.

3 p.m. Evensong and Sermon at Terra Nova.

3 p.m. S. S. (Primary Classes).

7:30 p.m. Evensong and Sermon.

Tuesday—Jr. Choir practice at 4:15.

Wednesday—Jr. W.A. in Parish hall at 4:15 p.m.

Girls' Auxiliary, Parish hall, 7:15.

Thursday—Sr. W.A. Parish hall, 3.

Friday—Evensong at 7:30 followed by Choir practice.

The Sunday after Ascension Day, May 29th is known throughout the Church in Canada as Mission Sunday, and offers a special opportunity for everyone to express their thanks for many blessings received by making a thank-offering contribution to mission needs. All open offerings on this Sunday received in St. Ambrose will be credited against the assessment; and the money thus given will nearly all be kept and used in this Diocese.

GORDON MEMORIAL UNITED CHURCH

R. N. Matheson, B.A., Minister.

Dear stranger: If your home church is not in town, Gordon Memorial folks will be glad to welcome you to share in their activities and service.

Organizations of congregation meet:

Official Board, Second Tuesday of each quarter.

Communion Service, Second Sunday in each quarter, at 11:00 a.m.

Women's Missionary Society, the last Thursday afternoon of each month at 3 o'clock.

C.G.I.T., Tuesday at 8:00 p.m.

Willing Workers' Mission Band, the First and Third Mondays of each month at 4:15 p.m.

Ladies' Aid, Thursday afternoon at 3 o'clock, except last Thursday of the month.

Sunday, May 29th.

10 a.m. Church School.

No morning or evening service.

CHURCH OF THE BRETHREN

Sunday School, 10:30 a.m.

Usual services will be held.

ST. MARY'S CHURCH

Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a.m.

Promising Outlook For Big Celebration Here Dominion Day

All Day Program Planned For July 1st and Arrange For Saturday and Sunday--Program Starts at School in the Morning-- Stampede, Races and Athletic Events in Afternoon

Arrangements for the big Diamond Jubilee celebration and Stampede to be held here on Dominion Day took another step forward at a meeting of the Executive last Monday evening.

All committees reported favorable progress in their plans and it now appears certain that nothing but unfavorable weather or lack of interest on the part of the public can prevent this being the biggest day in the history of Redcliff. The program provides for a whole day's activities, beginning at the school at nine o'clock in the morning where a procession will be formed. Returning to the school a program of patriotic songs, drills and tableaus will be put on by the children and short addresses given by local speakers. After this there will be a program of athletic sports for school pupils, in all grades. During the morning souvenir Jubilee medals will be distributed to all school children both in town and from the several surrounding school districts. School children should make it a point to be here for the morning events.

The afternoon will be taken up with the usual stampede sports, horse races and athletic events events, the program for which is as follows:

Saddle Horse Races

Event	First	Second
Girls 15 and under	$ 5.00	$ 2.50
Boys, 15 and under	5.00	2.50
Ladies Race	10.00	5.00
Cowboy Race	10.00	5.00
Ladies Relay Race	10.00	5.00
Six furlongs, open	25.00	10.00
Novelty Race	12.00	6.00
Relay Race, open	30.00	15.00
Third Prize, $5.00		
Half Mile, open	25.00	10.00
Mile Race	30.00	15.00
Pony Race, 14½ hands and under	15.00	8.00

Bucking Contest

In saddle—First $60.00 and statue, second, riding boots and $15.00.

Steer Riding—First $15.00 and second, $5.00.

Athletic Events

100 yard dash, 200 yard dash, 440 yards, half mile, marr[illegible] ladies race, ladies race, open, ladies egg and spoon race, men's three legged race, old man's race.

For all these events good valuable prizes will be given.

In keeping with the plans of the Dominion Committee, provision was made to have Redcliff oin in the link of bonfires which are to stretch across Canada on the night of the First. A committee consisting of J. Kitchen, A. Brydle, Wm. Nussey and W. Champ, was appointed make the necessary arrangements for same.

The day's program will close with a big dance, arrangements for which were left with a commitee of Messrs. W. Campeau, A. Dubeau and G. H. Worts.

It was also decided that space on the grounds for booths will be reserved for local merchants and organizations and that no charge will be made for same. Those desiring same should hand in their names to the secretary, E. L. Stone.

As Saturday following has been declared a dominion holiday for the continuance of the Diamond Jubilee celebration, the committee decided to join with Medicine Hat in the program which is being arranged there for that day.

A committee was also appointed to see if arrangements could be made with local clergymen for an open air service on Sunday, the 3rd. Particulars of this will be announced later.

On the whole, everything now looks like a real three days fitting celebration for this very important milestone in Canada's history.

Canada Also Breaks Pact With Russia

Action Follows Meeting of Dominion Cabinet Yesterday

The Dominion government has decided to terminate immediately the trade agreement with Russia, it was announced following a lengthy meeting of the cabinet Wednesday afternoon.

Premier King in making the announcement declared upon after a full discussion of the situation created through the decision of the British government to sever its relation with Soviet Russia. Evidence in the hands of the Canadian government made it clear, the Premier said, that certain sections of the agreement between Canada and Russia had ben violated by the Russian government.

Premier King pointed out that the agreement was subject to termination unless certain conditions were fulfilled. He specifically noted a provision that the parties to the agreement agreed to refrain "from hostile action or undertakings against the other and from conducting outside of its own borders any official propaganda direct or indirect, against the institutions of the British Empire or the Russian Soviet Republic, respectively.

Premier Baldwin's statement in the British House of Commons Tuesday and evidence before the Canadian government had made it clear, the Premier said, that his agreement had been violated.

WHEAT POOL NEWS

The municipal district of Success, with office at Leo, Alberta, has signed up to Second series of wheat Pool contracts, which means that all the grain raised by that municipality on its own lands will come into the Pool for another five years.

The Alberta Wheat Pool has purchased a terminal elevator site at Vancouver, the price being $15,000. This site is an excellent one, being advantageously located on Burrard Inlet. Over a year ago the Pool took option on this location and this option was taken up a short time ago. The Pool has no definite plans to announce regarding the building of a terminal of its own on this site, but eventually this is what will undoubtedly happen. At present the Alberta Pool has under lease No. 2 terminal elevator, owned by the Dominion Government.

The increasing activity of the Alberta Wheat Pool in securing additional line elevators and leasing No. 2 terminal at Vancouver, has meant that the head office staff and office space be increased. The Pool has leased the greater part of the sixth floor of the Lougheed Building, Calgary, and this space will be occupied by the Pool Elevator staff and the staff of the western branch of the Canadian Wheat Pool. At present the second floor of this building is occupied by the office force of the Pool, so that after the first of the month virtually two floors in this building will be under lease to the Alberta Wheat Pool.

The Scottish football team now on a tour of Canada, played their frist game in Montreal last Tuesday winning out by 3 goals to 2. At the end of the first half the score was one all. Half way through the second period eMntreal again took the lead and 4 minutes before time was up Scotland equalized. Two minutes before the whistle blew Gallaher scored again for Scotland on a penalty, winning the game.

Mrs. Wm. Waters Passed Away Suddenly

Funeral From the Gordon Memorial Church This Afternoon

One of the saddest and most sudden deaths we have been called upon to report for some time was that of Mrs. Wm. Waters, which took place about seven o'clock last Saturday evening.

Deceased had been going about apparently in her usual good health until about three o'clock in the afternoon when she complained of a headache. Indeed, she had been making plans for the evening and the next day. As time passed the pains in her head became worse and Mr. Waters was called from his work. Thinking it a severe billious attack deceased was induced to liedown. After doing so she appeared to have been relieved and to have fal len asleep, but a few hours later she became unconscious and Dr. Patterson was at once called, when it was found deceased was suffering from abnormal blood pressure.

Just as preparations were being made to relieve the pressure, she passed away.

Deceased whose maiden name was Isabel Carr, was born in Scotland, 49 years ago. She and Mr. Waters came to Canada in 1911. In the same year they located in Redcliff and have resided here ever since. Besides her husband deceased leaves a family of four daughters and two sons to mourn the loss of a loving, devoted wife and mother. The members of the family are Mrs. Carrol of Vancouver, Mrs. Hystead of Wallaceburg, Ont., Hilda and Katie, and George at home, and William of Redcliff.

The funeral was held over till this afternoon awaiting the arrival of Mrs. Carrol and Mrs. Hystead. The service will be held in Gordon Memorial church and will be conducted by Rev. D. Hollinger in the absence of the pastor of the congregation. The remains will be interred in Redcliff cemetery.

The sincere sympathy of the community goes out to the bereaved husband and family.

Local I.O.O.F. Has Successful Social

Crowd Has Such a Good Time They Get An Extra Hour

Young people in goodly numbers turned out to the dance given in Cliff hall last Monday evening under the auspices of the local lodge I.O.O.F., and it was unanimously decided as one of the best of the season. The music was so good and those present were so thoroughly enjoying themselves that when the time as advertised for closing arrived there was such an appeal for more that the orchestra was forced to yield, and kept the music going for an extra hour.

During the evening refreshments were served.

Early Settler of District Now Making Good

Andy Richmond Who Came Here from Scotland, Well Known Here

An item in last Thursday Medicine Hat News, giving an account of the present whereabouts and station in life of Andy Richmond created considerable interest to old-timers round here, as the subject of the article was at one time a familiar and well known young man of this district.

Two old-timers of the district, A. E. Smith and Robt. Louden, happened to be together when the News arrived and almost at the same instant they noticed the heading, "Andy Richmond Making Name inthe World." Naturally they became interested as both knew Andy. A rehearsal of the early doings in the district in which the subject of the article figured prominently, followed and it proved most interesting to those who heard it.

Richmond came to this district from Scotland as a young man and was first employed on the Stair ranch with Mr. John Ellis. After engaging in several occupations characteristic of the times, he decided to go in for veterinary surgeon and in due time got his diploma. He is now one of the leading vets in Toronto.

Tree Planting Special Train To Stop Here

WILL BE IN REDCLIFF SATURDAY, JUNE 4—LECTURES AND MOVING PICTURES IN THE CAR PREPARED FOR OCCASION.

Word has been received by C.P.R. officials here to the effect that the special train which is touring the west to encourage tree planting, will be in Redcliff on Saturday evening, June 4. In a car especially arranged for the occasion, lectures will be given and moving pictures shown to demonstrate this important work on the prairies. The program will commence at 8 p.m.

This special train is arranged by the Canadian Forestry association and with the assistance of the railroad companies and a group of subscribers who defray all expenses.

The object of the movement is to encourage the planting of trees as windbreaks, to prevent soil drifting, to moderate wind damage to growing crops, to help conserve moisture and to beautify farm and town surroundings.

This is a movement in which town and country people alike should take a keen interest.

U.F.A. organizations in this immediate vicinity should see that their locals are well represented here on that occasion and townspeople who are contemplating beautifying their homes should also take advantage of the opportunity to get some pointers.

Let us show that we appreciate the fact that the train is stopping here.

Trainmen Arrested For Manslaughter

As Result of the Wreck Near Seven Persons on April 9th

Echoes of the train wreck near Seven Persons on Saturday, April 9th, when "Gunner" W. Swans and C. D. Baines were killed and Lou Ward seriously hurt, when Westbound Extra 2099 met 1st Eastbound 980 in a head on collision, were heard in Lethbridge yesterday, when M. L. Dooley, former agent at Seven Persons; W. P. Johnson, who was in charge of Train 980, and Chief Despatcher J. W. Kipp of Lethbridge, were arrested on charges of manslaughter.

Warrants were issued from the offices of the Alberta Provincial Police at Medicine Hat, upon advice from the Attorney General's Department, Edmonton, and forwarded to Lethbridge, where they were served yesterday morning. Bail is set at $5,000 each and it is expected that arrangements will be made today. The case will in all probability be heard in Medicine Hat on or about June 1st.

Alberta Motorists Want Highway Policy

Provincial Organization Urges Three Year Program

With Canada reaping a harvest of more than $100,00,000 yearly from the tourist traffic at the present time, and the summer camping movement from the United States scarcely commenced to this country, Alberta should energetically prepare to meet this tremendous traffic of all-weather main highways which would open the Last West and the wonderland of mountain scenery on a scale sufficient to obtain magnificent returns in capital and capital an new settlers within the next few years.

This was the unanimous opinion of members of the Alberta Motor association representing many parts of the province at the first annual meeting held in Edmonton, May 17th. Officials of the Association with a first hand knowledge of conditions reported that veritable armies of tourists from the United States are anxious to "explore" Alberta once they have the assurance that all'weather highways are available.

The meeting adopted a resolution calling on the provincial Government to embark on a three-year main highway building program with an outlay of $10,000,000, to be raised by a capitalization of the revenue now received from the motor vehicle license and the gasoline tax, amounting this year in round figures to $1,500,000.

Its fine qualities preserved in the modern *Aluminum* package.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good.

One of Canada's Assets

Every citizen is, or should be, interested in all things pertaining to the development and prosperity of Canada, whether he views it from a broad patriotic and national standpoint or the more selfish one of how his individual business and welfare is affected. Anything any citizen can do to advance national interests and progress is, therefore, to be expected of him.

It is generally recognized that it is in the interests of a country to develop its export trade to a point beyond the volume and value of its import trade; in other words, to create what is known as a favorable balance of trade. Export trade is made up of those articles produced or manufactured in Canada and sold in other countries; import trade consists of produce and goods of other countries brought into Canada and sold to its people. That is, Canada must send its money abroad to pay for imports, while on the other hand, foreign money is paid to us for goods we export. In practice, of course, exports really pay for our imports; hence the strength of developing exports in excess of imports.

There is, however, one exception to this general rule. Money itself when imported adds to the wealth of the country much the same as exports of produce and goods adds to it. And it is immaterial the form in which such money may come.

Of late years a new industry has developed on the North American continent, although it is an old industry in France, Switzerland, and some other lands. We refer to Tourist traffic, which has long been a source of great income to France and Switzerland. Tourist traffic has, with the advent of the automobile and the building of good roads, become one of the major industries of Canada, and, unlike most imports, the more tourists we can import the richer Canada is made. It follows that everything in reason should be done by Canadians to encourage an increase in such traffic.

Tourists come to Canada for a variety of reasons. They are glad to get away from the excessive heat of the south in summer; with the development of so many large cities in the United States those who can afford to do so are anxious to flee to the woods, to the lakes and river resorts; some come for the purpose of hunting and fishing; some with the idea of investigation of Canada's resources and possibilities and investment therein. All in their travels look for comfort, pleasure and beauty of surroundings.

The mountain scenery and winter sports of Switzerland are that country's drawing cards. Canada can offer just as fine mountain scenery as Switzerland, and an infinite variety of other natural beauty which the land of the Swiss lacks. Canada's national parks are without exception among the finest in the world.

But to get to the main point of this article. Tourists travelling our provincial and country highways, en route hither and thither, desire to follow the most attractive and beautiful roads. Bare, treeless levels do not attract, but winding trails and roads through little valleys and park-like country make a powerful appeal. It is in these districts, too, that a profusion of wild flowers flourish, making the whole countryside beautiful and a constant surprise and joy to the visitor.

But these wild flowers are in danger. People exclaim at the beauty of a certain patch and forthwith proceed to break off the blooms or even tear the plants up by the roots. In a few short hours they are withered and thrown away. Had they been left undisturbed they would have given pleasure to scores of passing tourists, adding to the attractiveness of the route along which they bloomed. Not only so, but they would have reappeared next year and by scattering seed far and wide would have greatly increased in number. The serious thing is that through destruction their beauty was lost, not for one season alone, but for all time, and the loveliness which marked a spot this year is bereft of its charm in future years.

The moral is: Stop this thoughtless picking of our prairie and forest wild flowers. Try to realize that these wild flowers mean not only beauty to our country but that they attract visitors and have an effect in adding to the material wealth and prosperity of the Canadian people.

Making Animals Feel at Home

Lions and tigers in Bronx Zoo will have an opportunity to become acquainted with scenes of their childhood. Painted backgrounds purporting to picture the plains of Africa and the jungles of India, are being installed in the outdoor cages. Similar backgrounds were installed in the reptile house several years ago.

To the troubadour of old, we are indebted for most of our knowledge of the customs and thought of Medieval Europe. His songs, 2,500 of them, have been preserved. They deal with drama, romance and fable.

Diamond cutters who come to London to buy gems remain in semi-darkness until the time comes for examining the stones.

The Londoner Won

A traveller was talking of some of the great cities he had visited, and he happened to remark that London was the foggiest city he knew.

"Nonsense!" exclaimed an indignant Londoner. "I've been in a foggier place than London."

"Where was that?" asked the traveller.

"I couldn't find out where it was," replied the Londoner; "it was too foggy."

Keene, New Hampshire, claims to have the widest concrete-paved street in the world, measuring 140 feet from curb to curb.

When the sun shines lay aside a little of your enthusiasm for a rainy day.

Children Cry for

Fletcher's CASTORIA

MOTHER:– Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

Americans Use Radiophone

Calls Increasing With Advent of U.S. Visitors to London

Radiophone talks with America from London are rapidly increasing with the advent of United States visitors. It has been found that a large proportion of the calls from London were made by American business men staying there. Twenty-six calls to New York and elsewhere in the United States were made in one day last week from one London hotel and all by American business men. An American staying at a leading hotel paid for his telephone talks to Chicago four and one-half times as much as his hotel bill. One conversation alone cost him $275.

Painful Sprains, Bruises, Restored By Nerviline

There is soothing power in Nerviline that has made it famous for nearly fifty years past. It sinks in deeply, it penetrates quickly, it takes away the pain from a sprain and brings grateful relief to bruised, aching muscles. If your joints are stiff and you are suffering from Rheumatism or Lumbago; if Neuralgia bothers you now and again, use trusty old "Nerviline." It works wonders, whether the pain is internal or external. Get a large 35-cent bottle from your dealer today.

Sends Greetings to Canada

President of Cuba Pleased With Existing Friendly Relations

Expressing keen satisfaction with the financial and economic relations between Canada and Cuba, President Machado has sent cordial greetings to Canada through the Hon. Vincent Massey. The Cuban president discussed the affairs of the two countries with the Canadian minister during his short visit to Washington. It is understood that the rumored intention of Cuba to send a minister plenipotentiary to Ottawa was not discussed.—New York Morning Telegraph.

RHEUMATIC MISERY

Relief Can Only Come Through Better Blood—Liniments of No Use

In no other disease does the blood become thin so rapidly as in rheumatism. Not only does it become thin but it is loaded with impurities—rheumatic poisons. Without the proper treatment these poisons increase, the inflamed joints swell and the patient becomes a cripple. Most treatments simply aim to keep down the pain, hence with every unfavorable condition a renewed attack follows.

To cast out rheumatism the blood must be enriched and the rheumatic poisons driven out with the natural secretions of the body. This can best be done through a course of Dr. Williams' Pink Pills, which have a specific action on the blood, giving it new richness and redness. Thousands have tried this treatment with beneficial results. That every sufferer from rheumatism who does not try Dr. Williams' Pink Pills is neglecting the most hopeful means of recovery is shown by the statement of Mr. David Carroll, Pictou, N.S., who says:—"For years I was troubled with rheumatism. The pains were not continuous, but they always returned, and kept getting worse. I tried so-called electric belts and many medicines, but did not get more than temporary relief. Only those who have suffered from this trouble will realize what I suffered at times. I had begun to despair of getting better, when a friend urged me to try Dr. Williams' Pink Pills. In a short time I could feel this medicine helping me so I gladly continued taking the pills and soon found that every trace of the trouble had disappeared and there was a great improvement in my general health. It is now two years since I took Dr. Williams' Pink Pills and I have not had the least twinge of the trouble in that time. That is why I confidently recommend the pills to other sufferers."

You can get these Pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Company, Brockville, Ont.

Canadian Alfalfa Seed

The superior quality of northern grown seed is nowhere more strikingly shown than in the success obtained with Canadian alfalfa seed. For a long time it was found difficult to grow alfalfa successfully in many parts of Canada, but the development of an ample supply of hardy strains of seed has, to a certain extent, solved the problem of winter killing and the Dominion's alfalfa crop increased from 258,000 acres in 1920 to 858,000 acres in 1926.

Elevator Construction

Grain elevator construction in Western Canada this year will be on an unprecedented scale, no fewer than 350 elevators being already projected.

The largest refrigerating plant in the world recently was opened in Buenos Aires. It is capable of handling daily 5,000 sheep and 10,000 cattle.

Treat corns with Minard's Liniment.

"The Confederation"

Name Given to New Canadian National Train Commemorates Canada's Diamond Jubilee

An important extension of Canadian National Railways passenger train service between Eastern Canada and the Pacific Coast, is announced by H. H. Melanson, general passenger traffic manager of the System. Under a new schedule which becomes effective on June 24th, from Toronto, and June 27th from Vancouver, trains No. 3 and No. 4, now operating between Winnipeg and Toronto only, under the name of "The National" will operate between Toronto and Vancouver on a 93-hour schedule westbound and 91 hours and 10 minutes schedule eastbound. It It was announced also that in honor of Canada's diamond jubilee, the trains under the new service will bear the title of "The Confederation."

These trains operate with the latest type all-steel equipment, including tourist and standard sleepers, dining cars and radio-equipped observation library cars, and have proven very popular with passengers between Toronto and Western Canada points since their inception. On the new schedule, the trains will carry a mountain observation car between Kamloops and Vancouver, and will thus provide passengers with the opportunity of seeing the beauties of the famous Fraser River canyons en route.

An important change in the routing of "The Confederation" across the prairie provinces is also announced. Under the new schedule these trains will operate via Brandon, Manitoba, and Regina, Saskatchewan, thus giving through service to these important cities in the west.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

Farmers Appreciated Better Seed Cars

Attendance at 28 Manitoba Points Reached Total of 4,418

Final report on the work of the Manitoba Better Seed and Poultry Cars which were operated by the Manitoba Provincial Extension Department of Agriculture in conjunction with the Canadian National Railways, during February and March, shows that a total of 4,418 people visited the cars and attended the lectures at the 28 points visited.

These figures indicate an average attendance of 157 persons at each point, a satisfactory result in view of the fact that the Better Seed Cars were being operated for the first time and of the weather conditions which prevailed at some points. Of the total attendance 1,657 were children of Grade 8 and over.

In addition to lectures and a display of noxious weeds common to the districts in which the cars operated, practical demonstrations in the cleaning of seed were given and farmers were provided with lists showing the screens which should be used to produce the best results. Live poultry were used in the poultry car which also had accommodation for lecturing purposes.

The staff consisted of George Black, R. Whiteman; F. B. Hutt, and, at various times visits were paid by N. C. MacKay and H. E. Wood of the Extension Service Department and by officers of the Agricultural Department of the Canadian National Railways.

Is Becoming Important Factor

Tourist Business Means Millions of Dollar to Canada

The tourist business of Canada has grown to such proportions that it now is considered by the Dominion treasury to be an extremely important factor in the annual revenue of the country. How many people realize, for instance, that last year's turnover was very nearly $250,000,000? How many realize that this figure is nearly three times as much as Canada's entire budget was twenty years ago? But the important point to remember in this community is that this enormous business has been developed by the town and cities of the Dominion that have conducted campaigns similar to that which Victoria conducts every year. Yet some people hesitate about approving a small publicity grant instead of bearing in mind the relationship between the insignificant investment and the very large return.—Victoria Times.

Teacher: "Surely you know what the word 'mirror' means, Tommy. After you've washed, what do you look at to see if your face is clean?"

Tommy: "The towel!"

Minard's Liniment for dandruff.

Canadian Farmer Tells His Experience

"Les" Booth, widely known Ontario farmer, and a sick man for 20 years, suffered daily, only half alive. Now strong, robust, vigorous, credits new found health to Tanlac

Though popularly known as "Les," Mr. Booth's correct first name is George. His home is at 271 Perth St., Brockville. For the past three years he has enjoyed vigorous health but what he endured before then is best told in his own words. "For twenty years my arms, shoulders, back and hips, ached with rheumatism," said Mr. Booth. "Often I had to quit work entirely and I remember one bad spell that kept me in bed for six months.

"My case got to be so chronic that the help ran the farm. I was practically helpless. Even my wrists and hands would swell up so that I couldn't write my name. I dreaded bedtime, for I got no rest, but lay there in agony, waiting for morning. Nervous spells would seize me and I would tremble all over like a leaf. I couldn't get any benefit from my food and had to force myself to eat. My weight was far below normal.

"Three years ago I decided to give Tanlac a good trial, for nothing else had helped me. I could scarcely believe such results were possible as those Tanlac soon showed. The aching stopped, my appetite came back and I could eat heartily. My nights became more restful, too, and I slept soundly. I gained 16 pounds which I still retain, and I now work hard outdoors from 8 to 10 hours a day. *I never have an ache. It's hardly believable!* If folks want to know what Tanlac can do, tell them to write to Les Booth, or to come and see me. I'll tell 'em."

If your health is broken from overwork or neglect, profit from Mr. Booth's experience. Try Tanlac, nature's own body builder, made from roots, herbs and barks. Your druggist has it. Over 52 million bottles sold.

Destroy Machine-Carved Glass

Craftsmen Fear Machinery Will Ruin Hand Cutting Trade

Bohemia's famous glass-cutting industry is greatly agitated over the adoption of modern machinery to replace the process of cutting by hand, which has been the source of livelihood of thousands of families.

Fearing ultimate destruction of their handicrafts, 1,000 trade glass cutters, representing an ancient guild of craftsmen, invaded a half dozen factories and summarily demolished large stocks of machine-carved glassware. Intervention by the police failed to pacify the rioters and the disturbances are spreading through the glassware belt.

Production of a carload of machine-cut glassware requires less labor than a single hand cut vase, the revolting glass-cutters declare. They claim the foreign markets still demand hand-cut wares and announce their determination to halt further invasion by technical appliances calculated to destroy their profession.

Many Americans Live in London

Number Increases Fifty Per Cent in Ten Years

Although a heavy reduction occurred in the number of aliens living in Great Britain, the number of Americans living there increased almost 50 per cent. in ten years. This is disclosed by the general report of the 1921 census of England and Wales, published for the first time.

The total population of England and Wales numbered 37,886,699, of which there were 18,075,239 males and 19,811,460 females. Its density was 649 persons to the square mile, or about an acre per head greater than that of any other country in the world for which statistics are available. Nearly 80 per cent. of the population live in urban areas.

"Surplus" women increased from 1,200,000 to 1,700,000.

The Welsh language is shown to be gradually dying out.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

The man who knows nothing and wants to find out everything is almost as big a bore as the man who thinks he knows everything and insists upon telling it.

"Moto-Balloon" New Invention

Observation Post Can Be Quickly Transformed Into Semi-Dirigible

A "moto-balloon," capable of remaining immobile in the air as an observation post, though unattached, or of being transformed into a semi-dirigible within a half hour was launched at Milan, Italy, recently. It was christened the "A-P," after its inventor, Colonel Avorio, and his assistant, Passone.

It consists of a special type of captive balloon with the body replaced by a metallic tubular apparatus equipped with a 400-horse power motor and containing room for a crew of several men. It is capable of flying four hours at a speed between 30 and 40 miles an hour at an altitude of 6,500 feet.

Husband And Wife Are Both Benefitted

Mr. F. Spilay Speaks Highly of Dodd's Kidney Pills

Saskatchewan Man Who Suffered From Kidney Trouble Tells of the Relief He Sought and Found.

Springside, Sask. (Special)—"Both my wife and myself have suffered with strained kidneys, the pain being so bad at times that it was impossible for either of us to stoop and getting up was most difficult and painful. We used Dodd's Kidney Pills and found ready relief in them for this trouble."

This statement comes from Mr. T. M. Spilay, Box 2, Springside, Sask.

Dodd's Kidney Pills are purely and simply a kidney remedy. They act directly on the kidneys, strengthening them and putting them in condition to do their full work of straining the impurities out of the blood.

Dodd's Kidney Pills have restored sound health to thousands of troubled men and women. Give them a trial at once.

The road to good health lies through the kidneys, so keep them in good condition with Dodd's Kidney Pills.

"Were you in Paris, London, Berlin?"

"I really couldn't tell you. My husband bought all the tickets."

Man learns from his own mistakes, but he never lives long enough to complete his education.

A woman never thinks of her husband as a gambler as long as he does not lose.

BAYER

Genuine ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe → Accept only "Bayer" package which contains proven directions.
Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

New Carillon Of Bells At Ottawa Said To Be Largest Of Its Kind In The World

The carillon of 53 bells built at the bell foundry in Croydon for the Canadian Houses of Parliament at Ottawa, is the largest of its kind in the world. It is practically a sister carillon to the fine bells installed by the same firm, Gillett and Johnston, in the Park Avenue Baptist church, New York, but whereas the New York Bourdon bell weighs 9¼ tons, the Ottawa Bourdon weighs ten tons. The 53 bells extend through four and a half chromatic octaves from the Bourdon, low "E" to the 14-pound top treble, high "A."

Every bell is in tune with itself — that is, it has been tuned accurately on the five tone harmonic principle. The whole carillon has also been carefully tuned to the scale of equal temperament, so that the performer can moderate from one key to any other without offending the ear. Before Bach invented the 'scale of equal temperament' over 200 years ago, it was impossible to attain this result in ordinary music, and until the last few years this refinement was unknown to the bell world.

The carillon also has been tuned absolutely to international pitch, which is in general use for ordinary musical instruments and modern concert practice in both hemispheres.

The total weight of the bells is 53 tons and the weight of the steel framework and fitting is about 22 tons.

The inscription on the Bourdon bell is in English on one side and in French on the other; and round the top of the bell a continuous design of maple leaves has been moulded. At the special request of the Canadian Government, the wording of this inscription has not yet been divulged.

The world's record was achieved in the time taken to construct the carillon—from the date when all the details were settled all 53 bells with the necessary machinery have been finished in 18 months.

The 10-ton Bourdon bell will be the second largest individual bell in Canada and the third largest on the American continent.

An elaborate "practise clavier" is being supplied with tuned bars and resonators and having a keyboard exactly similar to that of the carillon clavier (or console) so that the carillonneur can learn fresh pieces without annoying the neighbors. A more important use of the "practise clavier" is to enable pupils to learn the rudiments of playing and acquire a certain amount of proficiency — particularly in pedal work — before playing on the tower instrument is permitted.

The clock mechanism is divided into three separate units, the "going train" driving the hands of the four 15 ft., 9 in. diameter clock faces, while the "striking train" and "quarter train" are placed 50 feet below, under the bells. The old-fashioned clock weights are dispensed with and in their place powerful electric motors lift and release the enormous clock hammers. The carillon will be shipped to Canada shortly, so as to be inaugurated on Dominion Day, July 1st. The Victory Tower is possibly the finest position in existence for the purpose of carillon music.

Sodium Sulphate

In Canada sodium sulphate, in the form of salt cake, finds its largest use in the pulp and paper industry, and is also employed in the metallurgical, glass, dye, textile, and other industries. Eighty-three occurrences of natural deposits of sodium sulphate have been located in Western Canada and an investigation of 21 of these by the Dominion Department of Mines shows the presence of over 215,000,000 tons of hydrous salts, mainly sodium sulphate.

Government Will Be Popular

The Government has ordered a national census on April 24, and has simultaneously published a decree providing imprisonment and fines for subjects giving false data. The only exception to the decree against falsifying is in the case of women who declare themselves younger than they actually are. No fine or imprisonment term will be levied upon them.

There are about 500 lobster canneries in Canada employing nearly 7,000 people. The normal catch of lobsters amounts to about 35,000,000 pounds.

Sympathy is like blond hair; a lot of it is not the real thing.

W. N. U. 1672

Values of Farm Lands

Average Value for Whole of Canada is $37 Per Acre

According to a recent compilation made by the Canadian Government Bureau of Statistics the average value of the occupied farm lands of Canada as a whole, including both improved and unimproved land, as well as dwelling houses, barns, stables and other farm buildings, is returned as $37 per acre, as compared with $38 in 1925, and with $37 in each of the two previous years. By provinces the averages are as follows: Prince Edward Island, $46; Nova Scotia, $36; Manitoba, $29; Saskatchewan, $25; Alberta, $26; British Columbia, $80. The average values in 1926 of orchard and fruit lands, including buildings, etc., in the fruit-growing districts are estimated to be as follows: Nova Scotia, $129; Ontario, $124; British Columbia, $320.

Ploughing Peas Under As a Green Manure

Results in a Lowered Yield of Wheat for Following Season

The ploughing under of peas as a green manure has resulted in a lowered yield of wheat the following season as compared with the bare fallow, in experiments conducted at the Brandon, Manitoba, Experimental Farm. Although, the ploughing under of the peas may increase the nitrogen content of the soil, this is more than counter-balanced by the loss of moisture involved. The later the green peas are ploughed under the greater is the amount of water dissipated. The experiments were were made on a rich loamy clay soil.

Winnipeg Newspaper Union Fashion

1429

The Bloused Silhouette a Smart Feature of New Mode

A great deal of charm is expressed in this frock with its bodice slightly bloused at the sides and across the back. The convertible collar and scarf tie lead the mode in chic, while the skirt ripples at the sides in an extremely smart way. No. 1429 is for misses and small women, and is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3½ yards 39-inch material; or 2¼ yards 54-inch. 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Highway Construction

Millions Spent on Provincial Highways in Canada in 1926

During 1926 a total of $45,563,000 was spent on construction of all provincial highways in Canada, according to computations made by A. W. Campbell, Dominion highway commissioner. Of this total $29,595,000 was spent on construction and the balance, $15,978,000 on maintenance of highways already constructed. The total mileage of roads involved in this aggregate expenditure was 46,824.

Older Ontario led with a total outlay of $21,170,000, total mileage involved being 15,861. The other provinces expenditure was divided as follows — Nova Scotia, $1,900,000, mileage 13,000; Saskatchewan, $3,925,000, total mileage, 2,400; British Columbia $3,478,000, mileage 4,000; Alberta, $2,140,000, mileage, 1,928; New Brunswick, $1,450,000, mileage 1,725.

Manitoba spent $1,100,000, of which $950,000 was on construction, total mileage, 800; Prince Edward Island, $220,000, mileage, 700.

The total mileage of highways constructed in Canada in 1926 was 5,768, and the largest mileage in any province was New Brunswick, with a total of 1,004; Older Ontario, with 859; Northern Ontario, with 823 miles; Quebec, with 718; Manitoba, with 665; Alberta, with 652, of which 275 was colonization roads; Saskatchewan with 489; British Columbia, with 303; Nova Scotia, with 252, and Prince Edward Island, with 30 miles.

Many Uses of Wood

Demand for Wood Now Greater Than Any Time in World's History

In spite of the increasing use of substitutes for wood the people of the world never before used as much of that material every week as at the present time. The modern steel ocean passenger ship has much more wood in its decks and fittings than would have built an entire wooden ship of sixty or seventy years ago. It was in all seriousness and without any idea of a play on words that a noted Canadian conservationist pointed out recently that in spite of all modern inventions man is still surrounded by wood in every stage of his progress from the cradle to the grave.

Date of Ploughing Summer-Fallow

Early Ploughing Appears to Give Better Results

In experiments conducted at the Brandon, Manitoba, Experimental Farm, the yield of grain following fallow has varied inversely with the lateness of ploughing the fallow. Ploughing on May 15 gave better results than ploughing on June 15, and ploughing on July 15 decreased the yield still further. Besides, the July ploughing does not control annual weeds. They grow unmolested until the time of ploughing and thus use up a great deal of valuable moisture.

Demand for Poultry

During one week in April, orders for over 75,000 white Leghorn pullets, from six weeks old up, had to be refused by breeders in Southern British Columbia on account of British Columbia on account of shortage of stock, though hatchings this season were larger than ever. Some breeders have given notice that orders for next season must be placed at once to ensure delivery.

Ted—"That broken-down old man wants to get married again."

Rod—"Wants to be re-paired, eh?"

Franklin Orginated Daylight Saving Idea

Scheme Was Propounded in 1784 Say British Writers

People of Great Britain, Belgium, Holland and France lost 95,000,000 hours of sleep as a result of clocks throughout these four nations being put forward one hour at the inauguration of summer time. The night of April 9-10 was fixed upon by an agreement reached in February between representatives of these governments, as the official start of daylight saving time. It will be in effect until the night of October 1-2, when normal time will be restored.

Credit for originating the idea of daylight saving, according to British writers, belongs to Benjamin Franklin, who in 1784, it is said, propounded a well thought scheme of daylight saving. In the story related here, a forgetful maid neglected to close the shutters of his bedroom window one evening, and the next morning Franklin was awakened by sunlight streaming into his room. He was naively astonished at finding daylight and sunshine at such an hour; and he was also greatly pleased with his discovery. In consequence he promptly worked out a scheme to make everybody get up at 4 a.m. during the summer months.

To enforce his scheme he suggested that all shuttered windows should be rationed and that church bells should be rung loudly on the appointed hour of rising. Further he proposed that if there were sleepy heads, "cannon should be fired in every street to wake the sluggards effectually." Under his scheme no one "regardless of rank, wealth or privilege" was to be exempted from early rising.

Experiment Was Interesing

Movement of English Channel Determined by Drift of Bottles

Interesting results of an investigation into the water movements in the English Channel are given in the journal of the Marine Biological Association. It is necessary to know these movements because of their effect on the drift of fish food and fishes about the seas.

In July 1924, 500 bottles were put in the sea, some designed for drifting on the bottom and others on the surface.

Surface bottles travelled rapidly up channel to the North Sea and across it. Many arrived in the Skager Rack, a journey of about 700 miles, made at the rate of more than six miles a day.

Two stranded in Jutland, three went ashore north of Goteborg, Sweden, and two at the head of Christiania Fjord. One bottle covered 1,440 miles at least and had done this in 190 days at "the amazing over-all speed of some 77.6 miles a day."

Jasper National Park

Jasper national park in Alberta, with an area of 4,400 square miles, is one of the largest "playgrounds" in the world. A part of the reserve to the north of the central section is still unexplored, but the park is being rapidly opened up by the construction of trails and highways.

Old Coin Discovered

While cleaning out an abandoned dwelling house at Bleary, Ireland recently, Patrick Toman found a five shilling piece bearing the date of 1646. Although the coin is 281 years old it is in a good state of preservation and is believed to be valuable.

A lot more people would take a friendly interest in you if you made a noise like a roll of greenbacks.

At the Music and Crafts Festival, Quebec

Interior of Ste. Anne de Beaupre Carving Shop with workers—This kind of work will be reproduced at the great Handicrafts Exhibition, to be put on at the Chateau Frontenac,May 20-22 next.

Vital Importance Of Forests As A Source Of Employment Should Be Fully Recognized

Just now a great deal is being heard about Canada's forest resources, their conservation and their destruction. "Save the Forest" campaign was held throughout Canada during the week April 24-30, and the Federal and Provincial governments, Organized Clubs, Pulp and Paper Association, Schools, Churches, Radio Stations and Theatres are cooperating in emphasizing the necessity of preventing forest fires and conserving our Canadian forest resources.

The potential value of the forests as a very great asset is being emphatically stressed, but the value of the forests as a source of employment affects us all vitally and particularly, says the Natural Resources Intelligence Service of the Department of the Interior, Ottawa. According to the latest census of figures, there are nearly 120,000 persons employed in the wood and paper industries of Canada and 40,000 in the logging industry. In the construction industry where wood plays such an important and essential part, another 185,000 are employed. Transportation services, which owe so much to products of the forest, which constitute one of their largest and most consistent sources of revenue, afford employment to nearly one quarter million persons, and so on. In fact almost every industry, not excluding agriculture itself, directly or indirectly relies for necessary equipment and supplies on the forests.

In connection with trapping, hunting and fishing, the value of the forest is of first importance, for if the forests were destroyed, fur and game animals would rapidly become nonexistent. The beauty of the forests, lakes and mountains, the abundance of game and fish, attracts many visitors and provides health and pleasure, also a large annual revenue to Canadians.

Forests grow, mature, deteriorate and decay. Once a tree has attained maturity nothing is to be gained by postponing its cutting. When cutting the mature tree, however, the protection of the small tree struggling for its existence near-by should be assured. The small trees of today are our forests of the future.

One well-known forest authority has suggested that in each district where timber rights are granted, the average annual growth per acre be ascertained and only the larger trees, to an extent not exceeding the annual growth of timber as a whole per acre, be cut. The forests would be growing in value year by year if this plan were followed.

The planting of trees and shrubs along highways and bordering fields for windbreaks will, as the practice increases, become a means of increasing the wood supply materially and, in the course of years, may build up a valuable source of timber supplies.

Investigates Marketing Conditions

Prof. Swanson Says London Has Again Become Financial Centre of World

"London has again become the financial centre of the world," Prof. W. W. Swanson, head of Saskatchewan livestock marketing commission, told the Canadian Press in London, after an extended tour of Europe. The commission had investigated marketing in England before going on the continent. Summarising the commission's findings, Prof. Swanson said it had been found Great Britain "a distinct improvement in business, and in the attitude both of capital and labor."

"We were very much impressed in Denmark by the manner in which the Danes have organized farming, both in its economical and social aspects," Prof. Swanson said. "Co-operation there has been carried to a pitch of excellence probably not equalled anywhere else.

"We were struck by the fact that the farmers themselves control their economic life, asking relatively little governmental supervision or assistance.

"The Danish educational system has been made an integral part of the economic life. In some Danes opinion the country is really overorganized.

"In Germany and Poland we found evidence that these people were making every effort to increase their agricultural and industrial output, putting aside the political animosities so rife at the end of the war."

Commercial Fisheries in the West

Fish to Value of $3,522,167 Caught in Lakes and Rivers of Western Canada in 1926

About 90 per cent. of the $3,522,167 worth of fish caught in 1926 in the fresh waters of the lakes of the Canadian Prairie Provinces — Manitoba, Saskatchewan and Alberta — found a ready market in New York, Chicago, Buffalo, Detroit and other American cities.

The market value of fish caught in the three Prairie Provinces shows an increase in value of $1,101,842 compared with the value in 1925. Whitefish, tullibee and pike were the principal kinds of fish exported to American markets, the first named being most in demand. Last year 111,000 pounds of royal sturgeon, from which comes the delectable and expensive caviar (the market price of which is about $1 per pound), a favorite dish with many epicureans, were caught in Manitoba.

Western Canada is chiefly famous as a great wheat producing and mixed farming country and comparatively little is known of its commercial fisheries and other natural resources. In the provinces of Manitoba, Lakes Winnipeg, Manitoba, and Winnipegosis are really fairly sized inland seas that yield the principal supplies of fish in Manitoba. In Saskatchewan the numerous lakes in the central and northern parts of the province are the sources of supply. The Alberta commercial fisheries are to be found mainly in the lakes north of Edmonton.

The Test

The big man was telling the interviewer how he got started in his profession.

"When I was an infant, my good folks were undecided what I'd become when I grew up, and they struck on a plan. They fetched an apple, a prayer-book and a dollar bill. If I played with the apple, a farmer I'd be—if I'd play with the prayer-book, I'd be a parson—if I'd play with the dollar-bill, I'd be a banker. They left me alone for a few minutes, and when they entered the room later I was eating the apple, reading the prayer-book, and I had put the dollar-bill in my pocket—so that's how they made me a politician.—Forbes Magazine.

The waters in the Canadian national parks in Western Canada offer splendid inducements to the angler. Five varieties of game trout have their habitat in the waters of the parks, namely, cut-throat, lake, Dolly Varden, bull, and brook.

England is attempting to introduce the Douglas pine. It reaches a height of 260 feet in this country, more than twice the height of any tree in England's forests.

Somehow the people who always say what they think have a mania for saying disagreeable things.

Manitoba Mining District

Provincial Department of Mines May Soon Be Established

That the mining industry of Manitoba has developed to a stage of importance that it requires closer governmental contact is indicated by the appointment of Prof. R. C. Wallace of the University of Manitoba, to the newly created post of commissioner of mines. This step is preliminary to the establishment of a department of mines in the provincial government, according to a statement given out by Premier Bracken. Dr. Wallace was commissioner for northern Manitoba for five years under the Norris government and is considered an outstanding authority on Manitoba mining. He will retain his position at the university, while acting as mining adviser to the government. His duties will be to co-operate with the industrial development board, the chamber of mines, and other mining bodies for the development of Manitoba's mineral resources.

Canada's exports of paper exceed those of any other country in the world, and in the matter of newsprint paper her exports are probably greater than those of the rest of the world combined.

Visiting Minister: Ah, my unfortunate friend, this world is full of trials.

Hard Case: It ain't the trials that worries, sir: it's the verdicts.

Wine still preserved in the cellars of a London dealer dates back to 1540 and 1631.

VIEWS OF GREAT MEN

Do not undervalue correctness, for although mere freedom from defect does not constitute excellence, which is in itself a positive quality, yet great defects deform the greatest excellence.

GIVE US A NAME

THAT old hardy perennial, viz the using of the word "Canadian" as a racial designation for census requirements when applied to persons born and raised in this country, is again occupying the attention of papers east and west, and many are suggesting that this Diamond Jubilee year would be a good time to adopt the word "Canadian" when applied to those who desire to be known as such in preference to being labelled after the nationality of their great grand parents.

We boast of our wonderful Canada, rich in scenery and the products of our forests, farms, lakes and mines. We advertise our Canadian wheat, Canadian beef, Canadian bacon, Canadian butter, Canadian cheese, Canadian nickle, Canadian asbestos, Canadian pulp, Canadian coal, Canadian gold and silver, and everything else of which a self-contained country like ours can boast, but, yet, legally, we have no Canadian people. The situation is absurd in the extreme.

If the same system as is used here were applied in the mother land where the population in years gone by was made up of Jutes, Angles, Saxons, Normans, French, Dutch, Germans, etc., we would now have on the throne one who would have to put down his ancestry as German.

If there is anything in the meaning of nationhood which is accorded Canada as a signatory to the League of Nations, then the ignoring of the term "Canadian" vitiates any such presumption.

Surely it is time this matter be given serious consideration.

THE OBJECTS OF SERVICE CLUBS

IN practically all towns and communities there are now Service Clubs of various kinds, which, while perhaps devoting a great part of their energies to specific lines of endeavor, nevertheless have one outstanding predominating characteristic common to all. That is the establishing between man and man whether competitor or not, whether rich or poor, whether of high or low degree in the community, a spirit of co-operation, good wil and mutual helpfulness. It is becoming daily more evident that much more can be accomplished, and much better conditions established, if men will work in harmony; if they will help and support each other; if they will so conduct their affairs as to be reasonably fair to all with whom they may have business dealings.

The principle can best be exemplified, so far as business and professional men are concerned by extending to each other in any community such business patronage as we may have to hand out, rather than to extend such favors to those from distant towns or cities. Give to your home business houses all the patronage you possibly can.

Two men were caught trying to break into a Woodstock church. We know of some towns where you couldn't coax men into church.

The last report from the Vital Statistics department at Otawa shows that there were 6,021 births in Quebec in one month compared with 11,036 in all the rest of the provinces in Canada combined. The fathers of Confederation knew what they were doing when they singled out Quebec as the province upon which to base the representation for the federal house.

One very important feature of the Diamond Jubilee should be the decorating of all homes and public buildings with flags, bunting, etc. The town should present a regular holiday and celebration appearance. A diamond Jubilee comes only once in a life time. Let us make it a real event. Mayors, councillors, trustees, lodges, churches, teachers and individuals generally should all join in making Canada's sixtieth birthday one to be remembered.

Here and There

When the internal trouble which has been devastating China for the last two years subsides, a tremendous market will open up for Canadian wheat in that country, according to J. E. Scott, representing a large British firm at Hong Kong, on his way back to London to report.

Bounties paid for bob-cats in New Brunswick, by the Department of Lands and Mines, have so far exceeded the figures for the corresponding period of last year, according to L. A. Gagnon, chief game warden, who states that wild cats are being killed in greater numbers each year.

Ontario buyers of milk cows have about completed the purchase of five carloads of Guernsey cows from Colchester, Cumberland and Pictou counties. The buyers are Anderson Brothers and Messrs. Graham and Calder from the Hamilton districts.

The first auction sale of horses that has taken place in Montreal for some years was opened at the East End Stock Markets, March 28. Stabling was put at 262 horses and it was stated that approximately 200 horses were sold. The demand was mostly for heavy draught horses, Percherons, Clydesdales and the like, for carters and for lumbering purposes, coming chiefly from Alberta and Saskatchewan, and some from the middle west.

Consequent upon an agreement reached at a general conference of Canadian and United States telegraph companies the Canadian Pacific Telegraphs have announced that code words will be accepted at all their offices in future for day and night letters. This departure will affect both Canadian and international business, the companies concerned being: the Postal-Telegraph Company, the Canadian Pacific Telegraphs, the Canadian National Telegraphs and the Western Union Telegraph Company.

The development of a new industry from the propagation of muskrats and other water fur-bearing animals, in land and water areas, leased from the Province of Alberta through agreement with the Dominion Government, was indicated by Hon. George Hoadley, Minister of Agriculture, in committee discussion in the Alberta Legislature. The amendment would give the Government power to regulate and license fur and game farms, and to lease the Dominion water and land areas for the propagation of such animals.

A keen competitor to Betsy Wiley, the Nova Scotia world's champion milk and butter producer, has been discovered at Fox River, Cumberland County. Mr. Henry S. Kerr of this place claims that he owns the [illegible] butter producing cow in [illegible]. This cow is a grade Ayrshire [illegible] Durham cow which has [illegible] for [illegible]. In one week she produced [illegible] of milk, which [illegible] of butter, after [illegible] approximately 12 quarts of milk [illegible] cream for [illegible]. The record is [illegible].

E. W. Beatty, chairman and president of the Canadian Pacific Railway, announced from headquarters recently that the name of the new hotel now being erected at Regina would be "Hotel Saskatchewan." The new C.P.R. hotel at this place will be an eleven story structure containing 284 bedrooms with bath and will cost in the neighborhood of $1,500,000, the opening being scheduled for May 24. The hotel is being built on one of the finest sites in the city on Victoria Avenue, facing the park. It will be only within a few minutes' walk from the C.P.R. Station.

The Canadian Pacific Railway made an excellent showing in 192[illegible] [illegible] for the twelve months being the best shown since 1920, while [illegible] revenue was the best shown [illegible], being nearly [illegible] million ahead of the fine record of [illegible]. [illegible] from railway [illegible] the year resulted in a very notable increase over the preceding fiscal year, the showing being one of the best on record, while income from special sources including ocean steamers, held up well, being only slightly below that of 1925 and also being one of the best exhibits ever made by the company.

Following upon his recent announcement to the effect that a Toronto firm of architects would be employed in connection with the erection of the new Canadian Pacific Hotel in that city, E. W. Beatty, Chairman and President of the Canadian Pacific Railway, recently stated that Messrs. Sproatt and Rolph had been appointed associates with the firm of Ross and Macdonald of Montreal, to handle this work. Messrs. Ross and Macdonald have been employed in Canadian Pacific work for some time, the latest of their buildings being the company's new hotel at Regina. It is desired that the new hotel shall be thoroughly representative of the city in which it stands and the appointment of a firm of Toronto architects is made to further this purpose.

The Bytown Troubadours

1—*Pierre Gauthier* 2—*Fortunat Champagne* 3—*Charles Marchand* 4—*Emile Boucher* 5—*Miville Belleau*

The good old French-Canadian songs, richly harmonized and interpreted with taste, have always met with great success, but one has to hear them rendered by several voices to enjoy their fullness of poetry and music. In order to present such songs in their most artistic setting the Canadian Pacific Railway obtained the services of Charles Marchand and his famous Bytown Troubadours for the Folk-song and Handicraft Festival held at the Chateau Frontenac this spring.

This quartet was founded at Ottawa in 1926 by Mr. Marchand and the friends who seconded him in bringing these songs before the general public are: Fortunat Champagne, second tenor; Emile Boucher, tenor, and Miville Belleau, basso.

The leader and founder of the quartet was a former chorister of the Basilique at Ottawa. He is an ardent interpreter of the old French songs and is the very soul of the quartet. His profound knowledge of the rhyme characterizing the old country songs enables him to render them faithfully. This has resulted in an inspiring emulation among his friends mentioned above, who have entered with enthusiasm in interpreting the songs indigent of the Province of Quebec.

The programme rendered at the Festival by the Bytown Troubadours, consisted of songs by Amédée Tremblay, Oscar O'Brien, Paul Larose, Alfred Laliberté and Maurice Morisset. Pierre Gautier has arranged these songs for several voices, doing so with such skill that even greater charm has been drawn from the old harmonizations. Mr. Gautier came to Ottawa in 1920, after a brilliant career in France, as professor of piano and harmony.

The Bytown Troubadours is a unique organization in musical circles on the continent. Every member is imbued with the true spirit of French-Canada, enabling a faithful interpretation of the songs of their forefathers.

THE REDCLIFF REVIEW

Romeldale Sheep ---A New Breed

By A. T. Spencer, Spencer Ranch Co., Cranmore, Sutter Co., California

Practically all breeds of livestock were developed from a single family by having an ideal firmly fixed in mind, and moulding, improving and perfecting by careful selection and mating of breeding in the stronger points and out of the weaker.

This breeding was in response to the requirements of a combination of characteristics not fixed in any one established breed of sheep, and as the Romney and the Rambouillet between them carried the points desired, the plan had been to unite animals selected from the crossing of these two breeds and by careful continued selection and mating to stabilize a type combining the most desirable features from the two original breeds of sheep.

The object was to produce a sheep suitable to conditions of wet soil, pasturage of alfalfa and heavy forage, of high mutton quality, and necessity for twice a year shearing. As the Romney breed had more of these qualities than any other sheep, I selected it for the sire side, and obtained eleven head of Australian and New Zealand Romney Rams. The Romney being chiefly responsible for the development of the famous export lamb of New Zealand, I selected a particular type of these rams and mated them with a particular type and fleece of Rambouillet ewes, the first object being to get a blend from these two kinds of wool, carried uniformly over the entire animal. It was determined that there was a very good possibility of establishing a high three-eighth blood long staple fleece. Yearlings from these cross bred ewes were carefully selected when in full fleece and ear marked as to type and grade of wool carried, particular attention being given to fleece that would shear a staple wool in March and a French combining fleece in August. After three years of this kind of breeding and obtaining a flock of eight hundred of this class of ewes, they were also selected on a basis of body conformation. These selections carrying the desired fleece and conformation were mated with sires of similar breeding, selected for fleece and conformation and for the low heavy bone type. This process of breeding has been continued with increasing careful selection, until now we have the seventh generation, and each generation has proven more uniform in type and quality in wool than the previous one. They are very pre-potent when these ewes are bred to Hampshire rams, the lambs are only slightly colored on head and feet, and this lamb has proven to be the fastest growing lamb we produce for eastern shipment. We now have twelve hundred head of these ewes and they are shearing over twelve pounds of wool each year in two shearings, with a shrinkage averaging forty-six per cent.

New Style Roads In France

Iron Plates Are Durable But Become Very Hot In Sun

Heavy iron plates, as tthick as those used for battleship hulls, are now being laid down in France to see whether they will solve the problem of keeping road in good condition.

The plates are riveted to a concrete base and the plan is favored by the General Staff of the French Army, because the plates would form a valuable reserve of iron in case a long war developed.

Secondary roads could be stripped of their iron, and the concrete base would still remain to carry transport.

The iron roads are said to be as near wear-proof as possible, but they have the disadvantage of growing uncomfortably hot under the sun.

Pneumonia Kills Birds

A sudden change of temperature and humidity was ascribed by scientists as the cause of the deaths of thousands of migratory birds that fell from the sky near Watertown, S.C. Naturalists said the fowls contracted bronchial trouble much like pneumonia. Many that stopped to rest in trees fell to the ground a few minutes later.

The annual loss of timber at present suffered by Canada's forests through the agencies of fire, insects, and disease is greater than the amount annually used for all industrial purposes.

A handsome young chap strolled in. "Do they keep automobile accessories here?"

The little bookkeeper smiled her sweetest. "Only me," she replied.

Carry Out Secret Ritual

Nootka Indians Believe It Essential to All Their Acts

Before the Nootka Indian, who lives on the coast of Vancouver Island, goes out to catch a mess of fish, he annoints himself with unguents and oils, fasts for a time and carries out a complicated secret ritual which he believes will bring success to his venture.

The primitive people, Dr. E. Sapir, of the University of Chicago, told the central section of the American Anthropological Association, precede almost every common act by an involved ritual.

"This belief in the occult or supernatural manner of controlling events forms an anthropological question which the scientific worlds know little about," he said.

The ceremony preceding the harpooning of a whale is extremely complicated. It lasts for months and, among other things, consists of fasting for a four-day stretch, building effigies of the harpoon and canoe to be used. The warrior who is to perform the task also anoints himself with hemlock branches.

If, after all that, his success in whale hunting is indifferent, he trys another ritual.

The entire procedure is called "Osimich," or secret magic. Each family usually has its own methods and they are scrupulously passed down to succeeding generations.

There must be "Osimich" for getting codfish with hooks; for catching halibut, digging bait, making hats, getting wealth, for finding a bear's den and other common acts of primitive living.

The ritual usually starts out with this prayer:

"Look down on me, O Chief,
Have pity on me,
Cause me to be alive."

How Newton Acquired Love of Learning

Fight With School Mate Gave Him Ambition to Get Ahead

In connection with the two hundredth anniversary of the death of Isaac Newton so recently celebrated, it must be a source of pride to every Englishman to know that Newton conformed to the sealed pattern of the Englishman destined to make a great name in the world by an obstinate clinging to the bottom of his class at Grantham school in his early days there. But his reason for emerging from that traditional scholastic obscurity was characteristically original. We are introduced, then, to Newton at the bottom of the lowest class and apparently quite content to stay there. One day, however, the lout next above him kicked him in the stomach on the way into school. Though much the smaller, Newton took the only course open to a lad of spirit, challenged the lout to a fight superintended by the schoolmaster's son and licked him thoroughly. But it occurred to him (here is the Newton touch) that a mere physical victory was not enough; he must beat him in school also. He set to work, acquired a love of learning, and never became idle again. Generations of children have heard the story of the apple, but the kick in the stomach and what came of it was really much more important; but for that kick Newton's mother would have had her way and her son would have become a farmer instead of going to Cambridge.

Mistakes

When a plumber makes a mistake he charges for it.

When a lawyer makes a mistake it is just what he wanted, because he has a chance to try the case all over again.

When a carpenter makes a mistake it's just what he expected.

When a doctor makes a mistake he buries it.

When a judge makes a mistake it becomes the law of the land.

When a preacher makes a mistake nobody knows the difference.

But when an editor makes a mistake—Good night!

Many Municipal Gardens

London has about 250 squares, crescents, gardens and terraces — "oases in a wilderness of brick and stone." Some are owned by the London County Council, others by the city corporation and a few of the borough councils. Still others are privately owned.

Wood Buffalo Park

Wood Buffalo Park, Canada's game preserve near Fort Smith in the Northwest Territories, has an area of 17,000 square miles. It contains over 5,000 buffalo.

Tests completed recently demonstrate that hemp for fibre can be grown very successfully in many parts of Canada.

The Boon of Sleep

Scientist Has Predicted Discovery of a Chemical Substitute

Science has discovered drugs which put us to sleep. Why not one to enable us to do without slumber?

Irenee du Pont, of the famous family of powder manufacturers, has a chemical substitute.

Instead of retiring to bed for the restoration of a night's rest, the chemist foresees the time when a weary man will take a drug which will clear his brain, add to his efficiency and generally improve the human machine.

But what an appalling world it would be without nature's sweet restorer!

The chemists forget that sleep is one of the best gifts of nature. We sleep not merely because we are tired but because sleep itself is one of the greatest of pleasures.

There is more to life than the chemists can analyze and we wouldn't use the substitute for slumber even though the scientific delver discovered it. Science, moreover, knows hardly more about sleep than it knows about life, and that is little enough.

Doctors have looked through watch crystals at the brains of sleeping animals. They have measured the flow of blood and made series of interesting tests. Men have been kept awake for days at a time in order that their reactions might be observed. But sleep still retains its secrets.

So let the chemists worry along and when they find their sleep pill put it on the shelf along with synthetic food capsules, waters from the fountain of youth, and other unnecessary things.

Meanwhile sleep eight hours and enjoy one of the best of the gifts of nature.

Motor Cars in Canada

Total Number of Motor Vehicles in Canada Expected to Reach the Million Mark

Recently compiled statistics for 1926 show that Canada is second only to the United States among the countries of the world in ownership of motor cars. The Dominion, however, is in fourth place in the ownership of motor vehicles, as Great Britain and France each has a total of commercial vehicle registrations greater than Canada. The number of motor vehicles in the United States is given as 22,046,957; Great Britain, 954,368; France, 901,000, and Canada, 830,881. British North Borneo, the bottom of a long list of countries, has only 70 motor vehicles within its boundaries. It is expected that the total number of motor vehicles in Canada will reach the million mark this year.

Canada Growing Fast

At Canada's present rate of progress, her population may be 80,000,000 at the end of the century, Robert J. C. Stead, author and official of the department of immigration, said in an address at Ottawa. Mr. Stead made it clear that he was not predicting such a population for the Dominion, but simply indicating Canada's present rate of progress.

Highbrow—"Yes, Tom came for me in the dusk last night."

Lowbrow—"What kind of a car's that?"

It isn't what a man doesn't know that worries him, but what he knows others know he doesn't know.

Waging War On Mosquitoes

Airplanes to be Used in Testing New Chemical Preparation

The Brandon Sun notes that airplanes will be used this year to test out the efficiency of a new insecticide. The latest bulletin on the campaign south of the border announced that the Federal public health officials are interested in a recent report from Paris of a chemical compound "offering advantages over anything previously used in the fight against mosquitoes." The announcement is made upon the authority of E. Roubaud of the Pasteur Institute at Paris, whose high scientific standing has led the Washington bureau of entemology to plan tests of the new preparation. He explains that the new compound is "nonpoisonous to warm-blooded animals and fishes, and produces no injurious effect upon aquatic plants. It is," the description continues, "in the form of an extremely light dust readily driven by the wind. Settling upon the surface of the water, it brings about the immediate death of the larvae of the malarial mosquitoes, which are the top feeders, and with a subsequent slight agitation of the water sinks slowly in suspension where it is eaten by the larvae of other mosquitoes." M. Roubaud recommends a mixture by weight of one part of the powder with fifty pounds of very dry sand. The cost of this method of treatment is said to amount to about eight cents an acre at the present rate. The new compound, it is added "may prove to be a weapon in the hands of the Americans who are handling the question of mosquito control over very large salt marsh areas."

"Bachelor Staff" Disappearing

Only One Single Man Now in Attendance on Prince of Wales

One by one the Prince of Wales "bachelor staff" is disappearing, and the recent marriage of Sir Walter Peacock, administrator of the Prince's Duchy of Cornwall, leaves only one bachelor member on the York house staff.

Brigadier General Trotter, the Prince's groom-in-waiting, is now the only upholder of the one-time unbroken bachelorhood of the Prince's staff. While other members of the staff are forced to do the fireside duties at home, Trotter appears to enjoy more accompanying the Prince to dances and other social functions.

Premier As Sheep Farmer

The Ottawa Citizen states that "Right Hon. Mackenzie King, on a modest scale, is going into the sheep farming business. He has an estate at Kingsmere, in the Gatineau, to which he has been adding continually until now the property has a depth of four miles. As the place is well suited for sheep, the Prime Minister is going to try his hand at the business."

Well Predicts Weather Changes

Geologists are investigating the mystery of a well near Maupin, Ore., which predicts weather changes with perfect accuracy. It is 458 deep and alternately blasts air from its depths or inhales it with surprising velocity. It exhales with the approach of a storm and inhales when the weather is about to clear.

The man who looks straight ahead misses a lot on the side.

Scientists Working on Old Cave

Expect to Throw New Light on Legend of "Seven Sleepers"

New light on the famous legend of the "Seven Sleepers" is expected shortly as a result of excavations now in progress under the direction of a group of Austrian scientists at Ephesus, 35 miles from Smyrna. They are at work on a cave for centuries the accredited resting place of the Seven Sleepers.

According to legend the seven young men of Ephesus upon being persecuted for refusing to worship an idol, ran away about 250 A.D. and hid in a cave. The emperor ordered the cave sealed up. In 479 A.D. a workman digging the foundation of a house broke into the cave and found seven men asleep. They woke up when he called to them, and handed him money to buy bread and wine. The coins were of a variety minted more than 200 years previously. The seven were pronounced to be the same who had been walled in in 250 A.D.

The affair was officially proclaimed a miracle and there was great rejoicing.

Soon after the sleepers awakened they again sank into a coma and died, the legend runs. Their remains were buried together in a stone coffin, and later were removed to a crypt of the abbey church of St. Victor at Marseilles, France, where they still lie.

Not Necessarily a Temple

Pagodas Especially in China Are Often Merely Memorial Buildings

The word pagoda is European and has not a very exact significance. The idea generally conveyed is merely that of an oriental religious tower. The pagoda is customarily a temple, or part of a temple, and thus is of the greatest antiquity in origin.

A Chinese pagoda is often simply a memorial building, not connected with a temple or monastery. Here the usual form is an octagonal tower of many storeys, with a curved roof, and with an encircling ledge of roof, like that of a verandah, around each storey. Brick is the usual material of the Chinese pagodas. They are of no great architectural pretentions, although effective in outline. In some parts of the country their great number gives a curious aspect to the landscape.

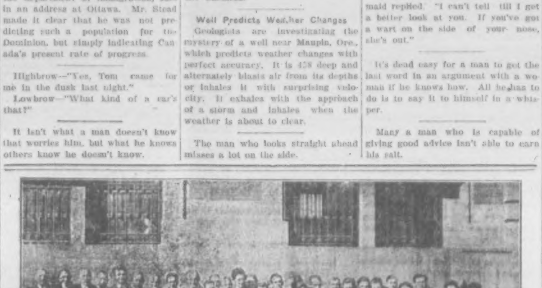

In Japan the Buddhist temple consists of three buildings — the hondo or temple proper, the gateway building, and the pagoda. In the magnificent stone temples of Indian Buddhism—they are among the finest buildings of purely monumental design—the pagoda is usually a pyramidal structure raised above the gateway or above the inner sanctuary.

"Is Mrs. Rise at home?" inquired Mrs. Chatters, standing in the shadow of the doorway.

"I don't know, ma'am," the new maid replied. "I can't tell till I get a better look at you. If you've got a wart on the side of your nose, she's out."

It's dead easy for a man to get the last word in an argument with a woman if he knows how. All he has to do is to say it to himself in a whisper.

Many a man who is capable of giving good advice isn't able to earn his salt.

Danes Make Peaceful Invasion

A group of Danes who have gone to the Danevirke Settlement at Alida, Sask., to take up farms. This party was organized by S. P. Hortness who, 25 years ago, settled at Alida, and last Fall went home to bring out his former neighbors. They crossed on Canadian Pacific steamer Montclare, and travelled C.P.R. lines to Winnipeg, being placed on their new lands within a week of landing.

May Be An Annoyance

Like Other Conveniences Television Will Sometimes Cause Discomfort

Television is the climax to the "tele" age, a marvelous device that fires the imagination even more than wireless telephony. That it will one day become a practical part of the average householder's growing list of everyday boons and conveniences goes without saying, for each invention of its kind, scoffed at at first, has eventually been developed so as to be within reach of all.

But it will add new terrors to a necessity. There are some, probably, who would deny that the telephone is a necessity. It is true that human beings could exist without the telephone. So they could without newspapers, the delivery and despatch of mails and other conveniences which they now enjoy but do not fully appreciate. Try, however, to carry on present-day business and social activities without them.

Yet the telephone is not an unalloyed boon. It is an enormous saver of time. It is also a waster of time. It permits any person with no other means of approach, from bounder to beggar, to get the ear of a person with work to do and with not the slightest desire to communicate with that person. Any bore with some theory to expound or some grievance to unfold can now catch his victim by telephoning, and schemes to circumvent him are unavailing, because the telephone bore is invariably able to overcome such schemes.

And now visibility is to be added to audibility in the telephone. The telephone addict will have a new means of causing annoyance and discomfort. He will now gesticulate and grimace as well as talk! And, out of an innate politeness, you will have to disguise your disgust. Already privacy is at a premium. When television becomes universal, our condition will rival that of Mr. Irvin Cobb's famous goldfish! — Ottawa Citizen.

Have a Garden

Every Farm Home Should Cultivate a Garden Patch

If you have not had a garden before, why not have one this year?

Apart from the diet value of fresh fruit and vegetables and the pleasure of gathering your own with the "dew of heaven" on them, there is nothing makes a farm more "homey" than a garden, especially if it is surrounded by hedges and trees.

Don't wait until you get old before you start to make a home of your place. Many a farm family who now reside on a bald knoll might be living in a well sheltered home by this time, if they had not kept putting off the day when they were "ready" to start a garden.

Start this spring with a few ounces of carragana seed, if you cannot afford to buy hedge plants and trees, and you will be surprised at the results you will get in three or four years time with a very small amount of care given to the young hedge. You will soon have a shelter for the tender varieties of vegetables and fruit, and you will soon be "lured" into getting a few "free" trees from the Dominion Forestry station or buying a few from one of the nurseries.

If you can't do much, at any rate, make a start this year.—Saskatchewan Farmer.

Electric Ticket Machine Speedy

All records for speed in booking passengers have been broken at Tooting Broadway Station, England, on the Morden Tube line, where in half an hour, 2,400 passengers were booked at four windows, a speed of twenty passengers per minute per window. The new electric ticket machine prints the tickets from blank paper on demand, and has a possible speed of 250 tickets per minute, printed, numbered, dated, cut, and delivered into the passengers' hands.

A young lawyer tried hard to give himself the appearance of being exceedingly busy. During his absence from the office he always left a card on the door marked: "Will be back in an hour."

On his return one day he found written underneath: "What for?"

Many a man goes around looking for trouble and the moment he meets it he has a hurry call in another direction.

It is sometimes difficult to convince the head of the house that two heads are better than one.

Ignorance may be bliss, but one's knowledge of one's ignorance is what blisters.

WORLD HAPPENINGS BRIEFLY TOLD

Production of coke from plants in Western provinces totalled 19,808 tons in March as compared with 18,069 tons in February.

Miss Harriet Franklin and Mrs. Zola V. Schauf, Portland, Ore., were killed when an aeroplane went into a spin and crashed.

Alaska is to have an official flag, designed by a 13-year-old boy, Benny Benson, Seward, who gets $2,000 for a trip to Paris.

President Coolidge has issued a proclamation asking for aid for the sufferers in the area flooded by the Mississippi river and its tributaries.

The Ottawa Citizen states that Right Hon. Mackenzie King, on a modest scale, is going into the sheep farming business. He has an estate at Kingsmere, in the Gatineau.

A definite forward policy for the Canadian swine industry, in view of the present market situation, was decided upon at the concluding meeting of the conference of livestock men at Ottawa.

Australians in London, on April 25, participated in an impressive ceremony at the cenotaph commemorating Anzac day, the anniversary of the landing of the members of the Australian-New Zealand army corps at Gallipoli in 1915.

Appointment of W. A. Hewitt, of Toronto, as manager of the Canadian winter sports team at the Olympic games next winter has been announced by the Canadian Olympic Committee. The team is to comprise figure and speed skating and skiing units.

Promotion of the port of Vancouver in customs rating has been announced effective from January 1, 1927. According to word from Ottawa, the port has been moved up a notch to class seven, that formerly held by Montreal and Toronto, which have been promoted to class eight. Winnipeg and Vancouver are in class seven now.

When women took to small, untrimmed hats the world over, they sounded the death knell of the ostrich farmer. Between 400 and 500 ostrich are being slaughtered daily in Cape Colony because of the slump in the ostrich feather market, and the plumage from the slaughtered birds is going into prosaic feather dusters.

Henry III. of France had so great a dislike for cats that he would faint at the sight of one.

Near Houston, Texas, the bullfrogs migrating from one swamp to another, caused a traffic jam.

Became So Weak Could Hardly Stand

Mrs. Wm. Palmer, Tomahawk, Alta., writes:—"Last spring I had a long spell of sickness and became so weak I could hardly stand. I could not sleep at night as the least little noise would wake me up. I tried blood tonics and other nerve pills, but they did me no good, and I was getting worse.

I wrote my mother about my condition, and she sent me three boxes of

MILBURN'S HEART AND NERVE PILLS

After the first box I was feeling much better, so I kept on until I had used the three boxes, and now I feel as well as ever I did when I was a young girl."

Price 50c. a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

New Machine Records Telephone Messages

Cylinders Take Half-Hour Conversation, Giving Warning of Time Limit

A new machine records a telephone conversation, then repeats it later when required, is the latest word in office equipment.

It is known as the telegraphone, and is a cross between a telephone and a dictaphone.

If an important conversation is to take place by telephone all that has to be done is to press the telegraphone switch and every word will be faithfully recorded.

Later the machine can be made to "play" the cylinder recording the conversation just like a gramophone.

Other advantages claimed for the machine are:—

It serves as a dictaphone with a microphone instead of a mouthpiece; and

In the event of a conversation being disputed it can relay the original conversation through the phone to the disputing party, even though he be hundreds of miles away.

It can also be used in conjunction with a wireless receiver to record telegraphic and telephonic messages, even Transatlantic ones.

If set for any hour of the day or night it will record automatically any message it picks up, stopping and starting as words or code sign are heard.

This conjures up the picture of the owner of a telegraphone going to bed and leaving his machine to take down a verbal message at, say, 5 a.m. from a business man in New York. In the morning the owner turns on the "gramaphone" attachment and hears the message that came over while he was asleep.

Each cylinder takes half an hour's conversation, and the machine gives ample warning when the time limit is nearly up. If the talk is not to be preserved the cylinder can be scraped and used again. It will stand scraping 90 times, giving it a life of 45 hours of conversation.

Searchlight to Pierce Fogs

Inventor of Television Discovers a Dark Ray With Wonderful Possibilities

Belief that the day may not be far distant when every vessel will carry an "invisible searchlight" to pierce fogs and every automobile a fog penetrating dark lamp is held by J. L. Baird, inventor of television, who has discovered a dark ray which he says will pierce thick fog or smoke.

Baird demonstrated his invention, which he calls "noctovision," at his laboratory in London and will fit a coastwise steamer with apparatus in June for further tests.

After witnessing tests recently, Admiral Mark Kerr said he thought the invention the biggest thing discovered for sea and air travel in a long time.

The admiral, with others, saw Baird transmit a doll's features through an artificial fog produced by chemicals so thick that his assistants were choked in it. The dark ray was described by its inventor as a sort of invisible searchlight which has 16 times the penetration power of ordinary light through fog or smoke.

Baird, who is understood to have discovered it as an outgrowth of his experiments with television, claims the new ray will rob fog of its terror and will make smoke-screens in war time useless.

One of the strange features of the ray is that it makes a sound when it encounters a solid object or even a ray of light. Each object produces a different sound, enabling determination of its nature. For instance, Baird said he found that the ray, when thrown on Nelson's monument in Trafalgar Square, produced a different note than when thrown on the dome of a nearby theatre.

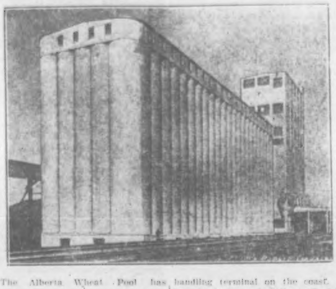

Searching For Lost Vessel

Wooden Sailing Ship Has Been Missing for 146 Years

British shipping authorities are helping to trace a wooden sailing vessel last heard of 146 years ago and once commanded by the famous Captain John Paul Jones. Launched 160 years ago at Portsmouth, New Hampshire, the ship was captured by the British during the United States War of Independence and became H.M.S. Halifax. She was later sold into the merchant service and nothing is known of her since. It is believed the vessel was sold to William Scott, Lord Stowell, who at the time was carrying on business at Newcastle-on-Tyne.

There is now only one survivor, Sir George Foster, of those who were Cabinet ministers under Sir John A. Macdonald. He entered the Government in 1885.

Operations of the Alberta Wheat Pool's Prince Rupert Terminal

The Alberta Wheat Pool has loaded twenty-two ships with wheat from the 1926 crop at Prince Rupert and expects to bring the total up to twenty-four before the crop movement is ended this spring.

The Alberta Pool terminal at Rupert has already handled 5,188,000 bushels and the total will reach 5,788,000 bushels within a few weeks. This is a larger total than was anticipated last fall.

The Prince Rupert house was built and is owned by the Canadian Government, has a capacity of 1,250,000 bushels and is probably the fastest handling terminal on the coast. It is under lease to the Alberta Pool for a term of two years. Joseph Bennett is superintendent of this elevator.

Through the Pool's extensive operation, the ocean freight differential has disappeared and grain is shipped to Europe from Prince Rupert at the same rate as from Vancouver.

Of the twenty-four ships already loaded or committed, six carried grain to the Orient and eighteen to Europe.

Previous to the Pool leasing the Rupert terminal, no wheat had been shipped from that port.

Smart Little Ones Go Simply Clad

Dressing the tiny Miss of two to eight is no less an art than providing lovely clothes for her mother or older sister. One of the prettiest and simplest frocks any little girl could have is pictured here, and one which busy mothers can make up in a very short time, for it just has a group of shirrings either side of the front and in the centre back. A simple chain stitch of colored silk floss is worked over each row of gathers, lending a bright touch, and holding the fullness firmly in place. Shirrings are again seen on the wrists of the full sleeves and pockets, while two-piece bloomers make this a most practical dress. No. 1434 is in sizes 2, 4, 6 and 8 years. Size 4 requires 2¾ yards 36-inch material; or 1⅝ yards 54-inch. 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Mount Machray

Mount Machray, 9,020 feet high, is situated to the west of Grant pass on the Alberta-British Columbia boundary. According to the Geographic Board of Canada, it commemorates the late Most Rev. Robert Machray, Anglican Archbishop of Ruperts Land and Primate of Canada. Archbishop Machray frequently spent his period of recreation in this district.

A scientific expedition in South America has discovered a tunnel three miles long and several inches in diameter, made and regularly used by ants.

China, the home of the silkworm, is buying quantities of silk in the finished garment from America and France.

Build Up Character

Psychologist Tells Us How to Develop Personality

Want to change yourself?

Easy enough says Henry Knight Miller in an editorial in the May issue of "Psychology Magazine." "Your present condition," writes Dr. Miller, "is but the externalization of the predominant impressions which through suggestion you have stored up in the sub-conscious mind, not the ideas which you occasionally entertain. What you persistently think determines to a nicety what you are and where you are.

"Learn to use this tremendous force," continues Dr. Miller, "and there is almost no limit to what you can achieve. This is the divine alchemy which transforms weakness into strength, poverty to wealth, sickness to health, and defeat to life triumphant. Your destiny is in your own hands."

Dr. Miller points out that it is through the Conscious mind that the Sub-conscious, which governs emotions and instincts, is controlled. The conscious mind is the guardian at the gates of the sub-conscious. The conscious mind consists of the faculties of attention, perception and reason. Learn to exercise these three and every situation in life may be rationalized and understood.

"The man who reasons," concludes Dr. Miller, "cannot be defeated by any chance circumstances."

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits which it performs. Expect real relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so called remedies have utterly failed.

Three Good Reasons

Auto Tourist—I clearly had the right-of-way when this man ran into me, and yet you say I was to blame.
Local Cop—You certainly was.
Autoist—Why?
Local Cop — Because his father is mayor, his brother is chief of police, and I go with his sister.

Noted men have been known to be superstitious. Charles Dickens believed in the luck of Friday and the Earl of Balfour when in the House of Commons was often seen to "touch wood."

Trees four feet in diameter that never grow more than one foot high have been found in Africa.

If you want to be sure of getting a lot for your money, see a real estate man. They have them for sale.

DANDRUFF.

Stop it with Minard's. A splendid tonic for the scalp.

MINARD'S "KING OF PAIN" LINIMENT

Carries On Unusual Business

London Woman Sells Greenwich Time Weekly to Watchmakers

One of the most unusual businesses in the world has been conducted for years by a London family. It is the business of selling the time to watchmakers.

The present owner of the business is Miss Belleville, daughter of its founder. Once a week she visits the Greenwich Observatory and sets her watch by the delicate time determining instruments there. Officials of the observatory give her a certificate to the effect that her watch has been corrected there. She then goes on the rounds of her clients, of which she has 50.

The business was founded in 1836. The then Royal Astronomer suggested to the elder Belleville that there were people in need of the exact time who were willing to pay to obtain it. He followed the suggestion and soon had a thriving trade with all the watchmakers of London as customers.

Upon the death of Belleville, his widow took over the business and, in 1912, when she became too old to get around she turned it over to her daughter.

The business brings its owner an annual income of about $2,500.

For all pain—Minard's Liniment.

Make Mendicancy An Art

Beggars in France All Carry Manual of Instructions

Mendicancy is an art in France, and Gallic beggars have a "Manual for the Use of Beggars" to instruct them in the art.

The book, which includes a "sucker list" of good prospects, emerged from the pocket of a beggar when a Paris judge admired his knowledge of humanity.

"Why, it's an art," exclaimed the beggar, drawing forth the textbook in explanation.

Most of the chapters are devoted to technical instruction, such as how to operate at baptisms, marriages, funerals and the methods of attracting sympathetic attention.

There is instruction in how to seem blind, simulation of certain ailments, faking of suicide attempts and the concealment of legs or arms for displacement by false ones.

A Russian Boy Prodigy

Eighteen Years of Age is Professor at University

A mathematical marvel, a boy of 18, has been appointed a full professor at the University of Tashkent, Moscow. His name is Nickolas Nazaroff.

He applied for admission at the Moscow University when he was 10 years old, but the college authorities refused to accept his enrollment. In a special examination, however, he convinced them of his fitness and he graduated with a summa cum laude degree, the highest attainable honors, when he was only 14 years old.

Had Lengthy Journey

Cabbage Grown in Texas Purchased at Grand Falls, Newfoundland

How far does a head of cabbage travel? A man in the city of San Benita, Texas, employed at a vegetable shipping house, was curious, and during the season he picked out an exceptionally large head of the vegetable and wrote a note on it asking the recipient to inform him where it finally landed.

Recently he received a reply to his cabbage epistle. It came from a buyer at Grand Falls, Newfoundland, clear across the continent.

Many a man breaks his bills downtown and then growls if his wife wants a little of the small change.

Some people are always taking offense, but somehow the supply never becomes exhausted.

An Oil that is Prized Everywhere.—Dr. Thomas' Eclectric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Ike—"Are you working, Joe?"
Mike—"Sure, I got a dandy job fixin' de trolley tracks. I hab to quit every minnit or so to let the cars pass."

Little Boy: "Mother, who put the statue under the kitchen sink?"
Mother: "Hush, sonny, be quiet. That's the plumber."

Unfortunately a man's epitaph comes along too late in the game for him to live up to it.

Greater Stamina and Longer Mileage

added safety and comfort—that's what Gum-Dipping, the extra process, gives to Firestone tires.

Gum-Dipping goes to the very heart of every cord, thoroughly saturating and impregnating every fiber with rubber—delivering greater economy, safety and comfort in the day-in and day-out service of the largest truck, bus and taxicab fleets—in the battle of tires on race tracks—and on cars of hundreds of thousands of motorists throughout the country.

Your tire costs will be materially lowered by having the nearest Firestone Dealer equip your car with these wonderful tires. See him now.

London Has Mystery Clock

Secret of Mechanism Will be Revealed Only to Purchaser

A clock with no sign of any mechanism is the latest novelty in London. It cost £800 to make. Although the crystal is transparent, no one except the maker knows how it goes.

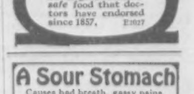

The face of the clock is embedded in a slab of crystal 5 in. in diameter, and the hands, made of platinum and diamond, revolve on a thin metal pinion. There is, however, no apparent connection between the hands and the framework.

Although rich enamel, gold, and jewels are used to decorate the framework, it is the craftsmanship that accounts for its high price, and the secret of the mechanism will be revealed only to the purchaser.

Record Building Activity

Indications are that building in Canada will be more active than it has been for several years. For the first three months of the year there is proposed construction amounting to $208,132,000, which is actually 44 per cent. higher than the total in sight at the corresponding period of 1926. The lead is taken by residential contracts, which is a natural result of the upward trend of business that has been noted for many months past.

If success doesn't turn the average man's head it's because he has a stiff neck.

CHAPTER XXXIV—Continued

Again Brandon smiled weakly, and indicated the bandages. "She is to blame for that. But I do not think she will give an alarm. That will await the men you left in the barn. The police will not be concerned much, when you have returned to them the plunder you collected. When you have sent them that, you will be as I said—paid double."

The expression on the face of the club house official who had heard the cryptic conversation began to show a gleam of understanding—a curious understanding of the hold-up which had sent the group of half hysterical women back to his hospitalities. Antoine noted and shifted, uneasily. Brandon too, alert despite his pain, saw. He called the man to the couch:

"Do not be concerned by the little drama in the mist tonight," he said, between his laborious breathings. "Your patrons who were robbed will receive their valuables, I have reason to believe. They will be none the worse for their experience. They may not know of it, of course, but they played their parts tonight in a great adventure."

Meanwhile, Joanna, her wrap unfastened again, her slim hands gripped to the wheel of the gray car, fought her way along the narrow road. When she rounded a turn just above the village of La Turbie little pin points of light shone up. Far down out over the sea, the lighthouse at the base of Cap Martin glowed like a far away eye of the night. The mist was lifting before the threat of dawn. Beyond La Turbie the country, although chaotic, was visible. The lamps along the sea boulevard were discernible.

The thought of Kenilworth, still captive with the other men in the hidden barn of the bandits, bothered her for a moment. An impulse came to turn around and, with the road partially clear, now, feel her way back to the hut she was certain she would recognize. She could, she considered, pick up someone at La Turbie to help her awaken the countryside. She decided against this plan however, settled back behind her wheel and shot into high speed.

The grounds of Villa Amette were vapored by the rising dampness of the dissipating mist. A solitary light, near the entrance gate, gleamed timidly. As she guided the car along the winding road to the house among the vague, gray shapes of the arbors and pergolas and pavilions which, in another few hours, were to be a blazing, fantastic background for her brilliant and lavish fete—the fete of the Golden Girl, and, also, her Swan Song! For Brandon had said "I am the one!" and he had said, too, "Whatever you have is to be taken from you. There shall be no more money!"

When she drew up in front of a side entrance to the villa she saw that the house itself was also dark. She considered whether or not to summon a servant with her horn, and decided to leave the car in the roadway and go in quietly. She ached for the aloneness of her room—the room which thronged the great golden bed.

At the ponderous villa doors she was troubled by the thought that she had never found it necessary to carry any sort of key. Servants always awaited her return, but they had to be summoned by the bell. She tried the door, however, and found that it was unfastened. She closed it softly behind her and felt her way across a tiny reception room to a draped arch that opened into a seldom-used drawing room. Across this room would be the grand hall from which a stairway led to the upper floors. When she was almost up to the heavy, double drapes which hung in the arched door that opened into the bigger room she stopped, suddenly. Between the curtains a line of light shone. She heard murmur of voices. Convinced that it would be servants, awaiting her perhaps, she pushed the curtains aside and stepped into the room. Then she stood, fascinated.

The voices swelled as the curtains parted. One of them she recognized as Yvonne's; the other, John's. And at the far end of the room she saw them, before the gentle glow in the fireplace, the only illumination in the room. Yvonne, gorgeous and Circe-like, her sinuous body wrapped in the sense destroying hues of rich red Burgundy, her only ornaments dazzling diamonds that glistened like a myriad of consuming fires in the gentle firelight glow, leaned forward in a cushioned, gilded chair. And at her feet—at "satin slippers never worn by Joanna's feet," as Brandon had taunted her — was John!

For one brief instant the thing before her huddled, and assumed a contorted shape. Then the smoulder in the fireplace burst into a flame of hell, and died again into something that flared as a grotesque mockery. Joanna's wrap fell from her shoulders. Her little hands dug into her breasts, but gave the senseless body no pain. The little figure in black stood, then, utterly lost to every thought but of what she saw—and heard.

"I have never known love until now! All else has just been a chimera. It is you who have shown what love's glory is! Please my wonderful dear, will you take me in and comfort me."

John's voice, that was: John! Passion and pleading and humility in it. All those nuances of adoration, submission, hope and prayer and yearning that Joanna had never heard in it.

Now, Yvonne's low, silvery cadences, infinitely sweet, and infinitely soothing:

"Are you content—will you be content—to accept from me the love that is the only kind that I may give you? The love that has blossomed and withered so many, many times? Mine can never be a pure love, my friend. And I may never promise its constancy. It is the crown that you may wear only while you can defend, and keep it. That is what is said of me, and my love, my dear, and I must not say to you that what is said . . . love, you and I, and if I give to you the portion I may spare you, you must be content. It can never be a holy love—there must always be something wanton in it. It must be the kind we take and put aside. Will that then, satisfy you?"

He crept closer to her. She put her hands about his face, warm, mesmeric hands. Her rich, soft, round lips—lips that were a sign of all love madness since the world began—went down to his. Then it was John's voice again:

"There can be no other love as wonderful as you can give. In any way that I may have it, if it be pure or defiled, I want it!"

A scream, a torrent of them, a frenzy of them, surged to Joanna's lips—and halted there. It was Yvonne who rose, slowly, sinuously gracefully, Joanna saw, as if it were some strange, fantastic symbol taking form at the rim of a distant horizon, a smile, a faintly lined, queer, and flitting smile, at Yvonne's red lips. And John saw, and got to his feet, sense-dazed and marvelling. Again that low, soft, silvery cadence of Yvonne:

"What a poor, damnable thing you are, my friend! Go preach, my dear. Preach to Joanna; preach to the heart and the soul and the wonder of her! Preach—but do it on your knees and take your text from the lesson I've taken the trouble to give you. Tell her that you've learned, at last, that you're only make-believe—you and all your kind. Tell her that if she'll have you, you'll try to learn from her the sort of thing her kind can teach."

John's voice, then, but Joanna didn't hear. She stumbled blindly back through the curtains.

(To Be Continued.)

If You Need a Tonic, Get The Best!

—Haytall

Mrs Sophie Salway of 135 Wilson St., Woodstock, Ont., (picture above) said: "I had had an operation and was expecting to have to undergo another. I was in a very poor state of health—was weak, it seemed that all my strength had left me. I could not do anything. It was quite necessary that I have a good tonic to make me strong enough for my second operation so I took Dr. Pierce's Golden Medical Discovery and it soon had me well and strong, and I came thru the operation without any trouble. Several other members of my family have taken the 'Golden Medical Discovery' with equally good results and all have words of praise for it."

Ask your druggist for Dr. Pierce's Discovery, in tablet or liquid form, or send 10c for trial pkg. of tablets to Dr. Pierce's Laboratory, in Bridgeburg, Ont.

W. N. U. 1679

A Strange Plant

Compass Plant of Texas Responsible for Saving Many Lives

A plant found in the prairie of Texas has been responsible for saving the lives of many persons who have become lost during storms. It was first brought to the attention of the scientific world by Gen. Benjamin Alvord. Known as the compass plant, it received its name from the strange property exhibited by its leaves of presenting their faces to the rising and setting sun.

The compass plant is a perenial, and during its first year bears radial leaves only. In its second year it is a flowering herb, with four or five leaves measuring from twelve to thirty inches in length.

It is found mainly in the prairies of the Mississippi valley and its peculiar powers were well known to hunters and settlers long before Gen. Alvord discovered it. When lost on dark nights they would search for it, and by feeling its leaves obtain their bearings.

World's Laziest Creature

Fresh Water Tortoise in London Zoo Takes Life Easy

The modern urge to "be on the go" has finally struck the Mantamata Terrapin, in the London zoo, which is known there as the world's laziest creature, resulting in its walking the entire length of its tank and at rather a fast pace, too. This fresh water tortoise, or turtle, had reduced the science of living to a minimum of ease and rest. For months it lay in one corner of the tank with scarcely a visible movement. Occasionally it gulped a fish which came within its range. Small water plants covered the animal's shell and it made no effort to scrape them off. Baby alligators played about the terrapin constantly, without disturbing its siesta.

Suddenly it went on its walk—upsetting the equanimity of all its tank mates—but apparently it has settled down again to another long rest.

Spelling Mistake Furnished Clue

Anonymous letters written to the villagers of Consignat, near Guerat, France, using threats and making fantastic accusations, have caused a reign of terror for the past two years. Many a farmer has, after receiving one of these letters seen his barns in flames. A young woman has now been arrested in connection with the case. In a letter dictated to her, she made a spelling mistake similar to one which occurred in one of the anonymous letters.

"Now, Abie," asked a teacher in one of New York's East Side schools, "what does the Statue of Liberty stand for?"

"Because, teacher, de vater iss too deep vere she iss tanding to sit down."

After a mounted policeman was run down by an automobile in England, a law was passed requiring night riders to equip their mounts with tail lights fixed to the harness.

Sell Airplanes on Installment Plan

London Dealers Keep "Samples" for Customer's Selection

Enterprising aeroplane dealers have entered the installment plan field alongside the furniture houses and real estate agents.

In London under the new order of affairs, two-seater machines, fully equipped, may now be bought for £230 down (roughly $1,150) and twenty-four monthly installments of £21 15s.

The installment plan ship has an eighty horse-powered engine of the latest type and can do 100 miles an hour.

A prospective purchaser may inspect "samples" in the downtown shops, pay down his cash, go to Stag Lane aerodrome, in the Edgware Road, on the outskirts of London, and flit away in his new craft with all the pride of the shopper who gets what he wants when he wants it.

MAKE CARE OF BABIES EASIER

Stomach disturbances and constipation are responsible for much of the peevishness of babies and young children. When the baby is cross or irritable the mother should not resort to so-called soothing mixtures to correct the trouble, for in the majority of cases these mixtures simply drug the child into an unnatural sleep. What is needed is a gentle laxative that will sweeten the stomach and regulate the bowels. Such a remedy is found in Baby's Own Tablets. They are easy to take and guaranteed to be entirely free from opiates and narcotics. Concerning them, Mrs. Jos. Tousaignant, Ste. Sophie, Que., writes:—"I would like all mothers to know that I feel there is no other medicine to equal Baby's Own Tablets. I always keep a box in the house and their prompt use never fails to restore my little ones to health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Use for Everything

Australia Making Millions Out of Jack Rabbit Pest

Australia once upon a time frantically wondered what it would do with the jack rabbit pest. These ferocious creatures ate up all the crops in sight. A government bounty was put on them. Then it was found that rabbit hides were good for material to build felt hats. Last year the pelts of 78,000,000 jacks brought $12,500,000 into Australia. There seems nothing so useless on earth but that it has real value. Some day we expect some genius will discover a use for moth holes.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

Alberta Sugar Beet Industry

The Canadian Sugar Factory Co., Ltd., of Raymond, Alberta, intends growing beets on half an acre of land in the vicinity of Red Deer this summer for test purposes. If successful, a new plant is likely to be set up in that vicinity.

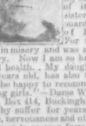

Bees can't talk, but they often get back at one with a stinging retort.

RESTORED TO GOOD HEALTH

Mother of Eleven Children Praises Lydia E. Pinkham's Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven living children, and my baby is five months old. I am only 38 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I knew of it from my sister, Dame Edouard Bellefeuille of Ramsayville. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to all young girls."—Dame WILLIAM PARENT, Box 414, Buckingham, Quebec.

Why suffer for years with backache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 98 out of every 100 reported they were benefited by its use.

Cuticura Preparations for All the Family

For generations Cuticura Soap and Ointment have afforded the purest, sweetest and most satisfactory method of promoting and maintaining a healthy condition of skin and scalp. Tender-faced men find the freely-lathering Cuticura Shaving Stick a necessity. Cuticura Talcum is an ideal powder, cooling and refreshing.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

Untold Wealth in Dead Sea

Is Fabulously Rich in Mineral Salts Says Chemists

The Dead Sea, so salty that fish and seaweed cannot live in it, has prospects of coming to aggressive life as a chemical production centre.

Scientists who investigated for the Hebrew University have completed a report for Dr. Chaim Weizmann, its president, who is now in the United States, showing this historic salt lake to be as fabulously rich in mineral salts as it is in Biblical lore.

The chemists recommend that in connection with the harnessing of the Jordan River for power, now under way, steps may be taken to utilize the treasures of this inland sea. Ways and means to carry out the recommendations are under consideration.

The Dead Sea, 793 feet below the level of the Mediterranean, contains 25 per cent. saline element in comparison with 4.6 per cent. in ocean water. It is so heavy that animal bodies will not sink in it. The report says it contains in millions of tons, potash, 2,000; magnesium bromide, 980; magnesium chloride, 22,000; ordinary salt, 11,000, and calcium 2,000.

The chemists estimate there is enough bromide to last the entire world 35,000 years at the present rate of consumption, and enough potash for 1,000 years. They also believe that production near the ancient site of Sodom and Gomorrah would be cheaper than anywhere else in the world because of the intense heat, which causes rapid evaporation. The Jordan River pours 6,000,000 tons of water daily into the sea, but its level never rises.

Legend incorrectly has it that the sea poisons the air so that plants cannot even grow near it nor birds fly over it.

Little Helps For This Week

Add to godliness brotherly kindness, and to brotherly kindness charity.—2 Peter 1. 7.

O brother man, fold to thy heart thy brother,
Where pity dwells the peace of God is there;
To worship rightly is to love each other,—
Each smile a hymn, each kindly word a prayer.
—John Greenleaf Whittier

As the rays come from the sun, and yet are not the sun, even so our love and pity, though they are not God, but merely a poor, weak image and reflection of Him, yet from Him alone they come. If there is mercy in our hearts, it comes from the Fountain of Mercy. If there is the light of love in us, it is a ray from the full sun of love.

—Charles Kingsley.

Farmers Enjoy Low Freight Rates

Speaking recently in the Senate, Hon. C. P. Beaubien said that farmers in Western Canada enjoy the lowest freight rates in the world. In Canada it costs 12 cents per bushel to move grain 794 miles, while in the United States it costs 22 cents per bushel to move grain 794 miles. The average rate per bushel on all grain in Canada, he stated, was about 15 cents, whereas in the United States it was 30 cents and still higher in the Argentine.

Alberta's Dairy Industry

Increase in North Alberta's dairy industry has caused the Edmonton City Dairy to plan additions to its plant this summer, at a cost of $350,000.

An Oil for All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Eclectric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore it should have a place in all home medicines and be amongst those taken on a journey.

The honest man who pays his rent has to hustle and the dishonest one who doesn't has to keep moving.

One of the things a man can't understand is why his enemies seem to have so many friends.

Keep Minard's Liniment in the house.

Wins Short Story Contest

Winnipeg Writer Submits Story That Takes First Prize

Lillian Beynon Thomas, Winnipeg, is the winner of the first prize of $500 in the $1,000 Canadian short story contest conducted by MacLean's magazine. Her story, "Five Cents for Luck," was unanimously chosen by the judges as the best of 536 manuscripts submitted. The second prize of $250 goes to R. V. Grey, of North Battleford, Sask., author of "Alouette." Two prizes of $125 are awarded to Mazo De La Roche, of Toronto, for her story, "Good Friday," and to Leslie MacFarlane, Haileybury, Ontario, author of "The Root House."

Albert C. Trimble, of Dauphin, Man., received special mention for "Ex Nihilo Nihil Fit." (Out of Nothing Nothing Comes.)

The entries were anonymous.

The winner of the second prize, R. V. Grey had never written for publication prior to this contest.

"Whistling for half an hour after meals," says a well-known whistler, "is the best possible aid to digestion."

? — Times One Pound

Multiply one lb. by the number of sheep you have. The answer is the extra wool you get by machine shearing. Have you 15 sheep? Why not begin now to get 15 lbs. more wool every season? Have you 300 sheep? You'll lose 300 lbs. of wool every time you shear with the old, slow and tedious hand blades. Machine shears evenly — gets longer staple wool which brings better price, sheep injured less. Anyone can use machine.

Stewart No. 9 Shearing Machine

Hand power. Sturdy construction—ball bearing. Built to last for years. Includes a comb and 4 cutters. At dealers $29.75 or send $2.00 to factory and pay balance on arrival (freight prepaid). Cow and horse clipping attachments $10.75 extra.

Satisfaction or money back.

A BROKEN DOWN SYSTEM.

This is a condition (or disease) to which doctors give many names, but which few of them really understand. It is simply weakness—a break-down, as it were, of the vital forces that sustain the system. No matter what may be its causes (they are almost numberless), its symptoms are much the same; the more prominent being sleeplessness, sense of prostration or weariness, depression of spirits and want of energy for all the ordinary affairs of life. Now, what alone is absolutely essential in all such cases is increased vitality—vigour, vital strength and energy to throw off these morbid feelings, and as night succeeds the day this may be more certainly secured by a course of

Dance Tomorrow Night

A number of Redcliff's popular young musicians are putting on a dance tomorrow (Friday) night in the Cliff hall. Your patronage at this dance will mean the holding of more such dances by these musicians throughout the summer. Dancing, 9 to 1 a.m. Admission, gents 50c and ladies 25c. Come early and get your money's worth.

A SONG OF MAY

Lo, May has come with quick'ning breath
To stir the emerald grasses
And call from out the sleep of Death
Each flower as she passes,
She bends benignly over all
—Her wheaths of glory weaving,
The world once held in winter's thrall
New beauty is achieving.

O subtle life, O breathless charm
Around our hearts entwining,
Each winter brings the spring time warm,
—Each cloud its silver lining,
And though the winter fain would give
A note more strong, compelling,
Yet May's glad song while I shall live
Will in my heart be dwelling.

—Mrs. Matheson

A HAPPY SOCIAL IS HELD IN THE PARISH HALL

Last evening a most enjoyable whist-drive social was attended by a good gathering of young and elderly people. The nice prizes provided were won in very keen competition by Mr. P. Mignetult (playing as lady), Ross McLackian, Mrs. L. Holston and Mr. H. Johnson, the latter winning in a draw. Messrs. Geo. Thomson and T. Dutton rendered an excellent selection of music kindly assisted by Miss N. Learmonth, Mr. J. Kerr and Mr. T. Jones.

FOR SALE—Sheep dog puppies Collie and coyote cross. $2.00 each. A. P. Easton, First St. North.

Notice

Will any person knowing of any cases of infectious diseases, not reported to the Board of Health, advise Mr. J. Kitchen, Sanitary inspector, or Dr. Patterson, Medical Health Officer, so that action may be taken against any such offenders. By order,

The Board of Health.

Water Notice

After this week the hours for using water for garden and lawn purposes will be from 7 to 9 o'clock a.m. and from 5 to 8 o'clock p.m. These rules must be strictly adherred to in future. Any disregarding same are liable to prosecution.

J. Kitchen, Town Constable.

Here and There

Nineteen ex-service men's families, sent out to Canada by the British Empire Service League, arrived at Quebec recently on the Canadian Pacific liner "Montrose." These families, totalling in all about 100 persons, have been carefully selected and have been given training at the Ministry of Labor's Training Farm at Brandon, Suffolk, England. The men will carry on farming in the Western part of the Dominion.

A unique "Seeing Canada" expedition will set out from Ottawa on August 4 this year to visit the principal points of interest in the provinces from the Atlantic to the Pacific. The party to make the tour will include a selected number of delegates to the World's Poultry Congress, to be held at Ottawa in July. Practically all the nations of the world will be represented, and the party will journey first to the eastern part of the Dominion over the Canadian Pacific lines.

Record wool clip and wheat output for the past year have placed Australia in a condition of prosperity that was never so great as at present, according to J. M. Myres correspondent of the London "Daily Telegraph," when interviewed at the headquarters of the Canadian Pacific Railway in Montreal recently on his way from the Commonwealth to England. He estimated that the exports from Australia had probably reached a record figure.

The farthest north settlement in the world, Bache peninsula, is cheered by radio programmes. Situated in the Arctic Ocean, 750 miles above the Arctic circle, this far-flung outpost is situated ten and one-half degrees off the North Pole. Here there is a post of the Royal Canadian Mounted Police, the garrison consisting of Sergeant Joy, two constables, and a few Eskimos. From November to March they do not see sunlight. Their one great pleasure is in listening to radio programmes from the outside world.

A unique musical event will take place at the Chateau Frontenac Quebec, May 20 to 22, when a folk song and handicraft festival will be held. The songs will be sung by local singers, famous for their knowledge of traditional airs of Old Quebec. French-Canadian folk songs are gaining in popularity throughout the country since so many of them have been translated into English by John Murray Gibbon, of Montreal. Charles Marchand, one of the outstanding interpreters of these old-time songs, will figure prominently at the coming musical festival.

President Coolidge's natal State Vermont, has been brought vividly to the attention of the Middle West, Ontario and Quebec by a special train known as the Vermont Maple Sugar Special, which has been touring the western states and which visited Ontario and Quebec in the latter part of April, carrying special exhibit of Vermont products and also a car of Canadian Pacific exhibits Governor John E. Weeks, Vermont's chief executive, and Mrs. Weeks together with his staff, the United States Senator for Vermont, and many other State legislators and representatives of leading business interests, were aboard the train during its extended tour.

Sidelights on the Chinese situation were thrown by travellers from a trip around the world, who arrived at the Windsor street station in Montreal recently, on the last lap of their journey. They were Harrison Williams, well-known public utilities financier of New York ... [illegible]

Interesting Local Items

Mr. and Mrs. D. McLachlan have taken up their residence in their old home on First St.

A. J. Learmonth will move this week end into the new residence he recently purchased on Fifth St.

* * *

Frank Congram has sufficiently recovered from his recent illness to be able to return to work again.

* * *

Mr. and Mrs. Ed. Cooke and family are spending this week visiting friends at different points in Saskatchewan.

* * *

Word was received in town recently announcing the birth of a daughter to Rev. and Mrs. Paton, formerly of Redcliff, but now of Abbotsford, B.C.

* * *

Rev. R. N. Matheson and Messrs. Wm. Henderson and E. H. Sellhorn, are attending the provincial conference of the United Church in Calgary this week.

* * *

Mrs. Joe Jacobson, who has been in the Medicine Hat hospital for several weeks, returned home last Sunday. Although still quite weak she is gradually improving.

* * *

Slater Murphy of Brooks, was in town yesterday on business. Slater is planning to leave shortly for his old home in Nova Scotia to visit his father.

* * *

After seven days rain the weather has again settled. The moisture of the past week has put the prairie in excellent condition. As far as the eye can see it looks like a new green carpet.

* * *

Some heartless vandal has played the mischief with the young trees which were set out around the swimming pool. They have been stripped entirely of their branches. This is a shame. If the offender could be found out he should be severely dealth with.

* * *

Ranchers of the district are having the annual spring round-up this week. A number of horses near town were rounded up yesterday and there will be another bunch run to R. N. Rose's ranch today. The horse are reported to be in fairly good condition.

* * *

The whist drive and social held in the Parish hall last Thursday evening, was thoroughly enjoyed by a goodly company. Miss Ada Vernon, Mr. O. Carlson, Miss Eva Pinder and Mr. Edmund Vernon were the prize winners. Messrs. Thomson and Dutton were unable to be present as early as usual, and Miss M. Podesta kindly presided at the piano, giving a few selections which were very well received.

Wm. Laidy of Medicine Hat is spending the day in town visiting his mother.

* * *

Mrs. John E. Kitchen, formerly of Redcliff, has entered the hospital at Sherrness, Alta., to train for a nurse.

* * *

George Abbott of Regina, spent the week end in town visiting Mr. and Mrs. Wm. Wheeler.

* * *

Teams are out dragging the town streets today. The yare badly in need of it after the week's rain.

* * *

R. C. Hargrave recently purchased the brick residence on Broadway near the Premier brick plant and moved into it this week.

* * *

Mrs. Reg Conn of Brooks, arrived in town this morning to attend her aunt's funeral which takes place this afternoon.

* * *

Drilling operations are still being delayed at the oil well here, awaiting the arrival of repairs for the machinery. The men on the outfit are greatly disappointed with the long delay.

* * *

Football fans who are contemplating seeing the Scottish players when they appear in Calgary should make reservations for their seast with Mr. Goldie of Medicine Hat. This should be done at once as seating accommodation is limited.

* * *

There will be no morning or evening service in Gordan Memorial church next Sunday as the pastor is attending the conference in Calgary. As he is on several important committees it will be necessary for him to remain over in the city till the following Tuesday. Sunday School will be held as usual.
